 WELLMARK INTERNATIONAL

The City of Dallas Water Utilities (DWU) commends these Blue Thumb award winners for outstanding performance in DWU's Pretreatment Program. These significant industrial users met all of their wastewater permit requirements and reporting requirements for the 12 months beginning July 1, 2013 and ending June 30, 2014.

By doing so, they made it possible for DWU to clean wastewater before returning it to the environment and ensured continued improvement in the Trinity River water quality.
