Mosquito control spraying scheduled for two additional areas

Dallas – The City of Dallas has scheduled mosquito control spraying in two additional areas due to positive West Nile mosquito collections. With weather permitting; spraying is scheduled to begin at 10 p.m. on Friday, August 21 and conclude by 3 a.m. on Saturday, August 22.

Control Area 1; Scyene Road/Second Avenue: The control area is within an area bounded by Scyene Road, White Rock Creek and 2nd Avenue, S.

Control Area 2; Meandering Way/Coit Road: This control area is within an area bounded by Hillcrest Road, Beltline Road, Coit Road and La Manga Drive.

While the insecticide is considered safe, residents in the above areas should avoid contact with the spray by staying indoors. Persons inside a vehicle while trucks are actively spraying should remain in their vehicles with the windows up and the air conditioner on until the trucks pass and the spray is no longer visible. Persons out during the scheduled spraying time should be alert for trucks and should not follow them. Residents who come in contact with the spray are advised to wash the affected area thoroughly with soap and water. The spray breaks down quickly in the presence of sunlight and has no residual effect. Fish ponds should be protected and pets should be brought inside during the spraying period.

Protection against mosquito bites

Dallas residents are urged to take precautions against mosquito bites by reducing outdoor activity during evening and nighttime hours. Residents who are outside during these times should cover their arms and legs and use a mosquito repellent.

Prevent mosquito breeding

Residents should eliminate standing water to prevent mosquito breeding and the spread of West Nile Virus. Breeding places for mosquitoes include swimming pools that are not kept clean, stagnant ponds, pet watering dishes, birdbaths, potted plants, old tires, empty containers, toys and clogged rain gutters & French drains. Standing water should be eliminated promptly, as mosquitoes can grow from egg to adult in as little as seven days.

To report standing water or mosquito problems Dallas residents should call 3-1-1. For additional information on Mosquito Control visit www.dallascityhall.com.
