CITY OF DALLAS

RE: Approval for Laticrete 9235

Mr. Conrod,

I have reviewed your request for approval of the Laticrete 9235 and concluded from the information submitted to my office for approval that these products are approved for use within the City of Dallas under the following conditions.

1. This product must be installed according to manufacturer's installation instructions, product listings, ICC ES Report (ESR-1058) and all applicable codes.
2. In order to install Laticrete 9235 the installer must receive prior approval for the installation of this product on each project. It will be the responsibility of the installer to obtain plumbing inspections and approval of installation prior to installing tile on the product. Note that every step of installation process must be approved prior to final approval of installation.

As with all new products I would ask that 4 sets of training literature and be provided for each of our four (4) district building inspection offices. This material can be forwarded to my office for distribution.

Therefore, use of this product may begin immediately in the City of Dallas.

This letter is not to be used for advertising, promotion, approval or endorsement of this product
