In addition, if passed, the 2024 bond program would fund public infrastructure to support economic development and affordable housing projects. In-person early voting takes place from April 22-30, including weekend hours. Election Day voting will be held on Saturday, May 4.

Bond financing is a type of long-term borrowing used to raise money for capital projects. The City receives money by selling bonds to investors. The City must pay back the amount borrowed, plus interest, to those investors over time. Using bond financing allows the City to spread the costs of funding capital projects over time. Bond financing is commonly used by local governments to finance capital construction projects.

The City's Bond Program includes general obligation bonds, which are secured by the full faith and credit of the City and repaid over a 20-year period. These bonds are repaid with revenue collected from City property taxes. The amount of bonds in the City's Bond Program is limited to what the City can repay with existing and projected property tax revenues.
