

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

REGION 6
1445 ROSS AVENUE, SUITE 1200
DALLAS TX 75202-2733

MAY 10 2018

Mayor Mike Rawlings
City of Dallas
1500 Marilla Street Room #5EN
Dallas, Texas 75201

Dear Mayor Rawlings:

RE: National Priorities Listing Addition of Lane Plating Works Inc.,

The purpose of this letter is to inform you that on May 17, 2018, the Lane Plating Works Inc., site in Dallas, Texas, will be added to the National Priorities List (NPL). This is the first formal step towards addressing environmental contamination and returning the site to beneficial use.

Under the Comprehensive Environmental Response, Compensation, and Liability Act (commonly known as Superfund), the Environmental Protection Agency (EPA) is responsible for locating, assessing and cleaning up uncontrolled or abandoned hazardous waste sites. After the site is added to the NPL, the EPA determines within one year whether potentially responsible parties will assess site contamination or whether the assessment is to be conducted with federal funds. The EPA also will assess whether a quick response to prevent releases from the site is needed within three months after listing. The EPA reaches out to the community within three months of listing to explain Superfund and the restoration process for the site. The EPA is committed to working with your community throughout this process and will provide updates of future activities at the site.

I am enclosing a fact sheet outlining the listing decision and information on the Superfund program. Information on this site will be available on the EPA's Superfund website at <http://www.epa.gov/superfund/sites/npl>. The Superfund website will be updated on May 15, 2018, with all of the supporting information on this site.

If you would like more information, or prefer a briefing or site tour, please contact Brenda Cook, Region 6 NPL Coordinator, at (214) 665-7436.

Sincerely,

A handwritten signature in blue ink that reads "Carl E. Edlund".

Carl E. Edlund, P.E.
Director
Superfund Division

Enclosure
