

**Avis Rent-A-Car**  
(Non-Industrial Facility)

Avis Rent-A-Car is a car rental service for public travelers utilizing Love Field. A car wash is located on the premises in order to service the rental vehicles. This carwash drains through an oil/water separator prior to discharging into the municipal sanitary sewer system. Shuttle buses are washed outdoors, in a sloped, bermed area that drains to the oil/water separator. Light maintenance (tire rotation, oil changes) is performed on site. Tires are recycled at the DFW facility but may be temporarily stored, indoors, at the Love Field site. A fuel bay provides gasoline for the rental vehicles. Key employees are trained in spill response. Safety meetings are conducted as needed.

<b>Chemical Inventory</b>		
<i>Item</i>	<i>Quantity/Where stored</i>	<i>Comments</i>
Waste oil	250-gal AST/inside shop	Secondary containment
Oil	250-gal AST/inside shop	Secondary containment
