

Jet Aviation Texas, Inc. (SIC 4581)

Jet Aviation Texas, Inc. (Jet Aviation) is a worldwide Fixed-base Operator (FBO) with based tenant, transient and charter services located at its terminal at Love Field.

As part of their operations, Jet Aviation performs fueling services for its customers. Nine underground storage tanks (USTs) are maintained: seven with Jet A fuel (5-12,000 gallons, and 2-15,000 gallons), another with AvGas (12,000 gal capacity), and a 1,000 gallon tank for waste fuel. These tanks are tested for tightness annually. In addition, three fuel tanker trucks (1@6000 gals., 2@5000 gals) are in service holding Jet A fuel while the third (1,200 gals) contains AvGas. In July of 2008 a 500 gallon AST for diesel fuel was added to the fuel supply. This container is stored at the bermed fuel farm in secondary containment. These trucks are inspected daily. Additional waste aviation fuel is stored at the fuel farm in a covered and bermed location. This waste is picked up by an approved contractor.

Jet Aviation performs no deicing.

Floor drains inside hangar 4 are connected to an oil/water separator prior to discharging into the municipal sanitary sewer system.

Chemical Inventory		
<i>Item</i>	<i>Quantity/Where stored</i>	<i>Comments</i>
Jet A Fuel	5-12,000 gallon, 2-15,000 gallon USTs	
AvGas	12000 gallon UST	
Waste Solvent	1 drum/Inside hangar	Removed by contractor
Waste Fuel	2 drums/ at Fuel Farm	Removed by contractor
Waste Oil	2 drums/ at Fuel Farm	Removed by contractor
Motor Oil	1 cabinet/Inside hangar	Secondary containment
Diesel	500 gallon AST	Secondary containment
Waste Fuel	1000 gallon
