## Areas in Dallas to be sprayed for West Nile Virus today and tomorrow

**Dallas** – Mosquito pools in Dallas have confirmed positive for the West Nile Virus. Weather permitting, the areas delineated below are scheduled for mosquito control spraying on Thursday, August 18<sup>th</sup> and Friday, August 19<sup>th</sup> between 9 p.m. and 5 a.m. on each night.

**Control Area:** The area to be sprayed is within an area generally bounded by: 12500 block of Planters Glen Drive (75244): **LBJ FREEWAY** on the north, **WELCH ROAD** on the west, **NUUESTRA DRIVE** on the east and **PLACID WAY** on the south.

**Control Area:** The area to be sprayed is within an area generally bounded by: 6100 block of Royal Crest (75230): **PRESTON HAVEN DRIVE** on the north, **JAMESTOWN ROAD** on the west, **EDGEMERE ROAD** on the east and **TULIP LANE** on the south.

While the insecticide is approved by the Environmental Protection Agency for treatment, residents in the above areas should avoid contact with the spray by staying indoors. Persons inside a vehicle while trucks are actively spraying should remain in their vehicles with the windows up and the air conditioner on until the trucks pass and the spray is no longer visible. Persons out during the scheduled spraying time should be alert for trucks and should not follow them. Residents who come in contact with the spray are advised to wash the affected area thoroughly with soap and water. The spray breaks down quickly in the presence of sunlight and has no residual effect.

### **Protection against mosquito bites**

Dallas residents are urged to take precautions against mosquito bites by reducing outdoor activity during evening and nighttime hours. Residents who are outside during these times should cover their arms and legs and use a mosquito repellent.

### **Prevent mosquito breeding**

Residents should eliminate standing water to prevent mosquito breeding and the spread of West Nile Virus. Breeding places for mosquitoes include swimming pools that are not kept clean, stagnant ponds, pet watering dishes, birdbaths, potted plants, old tires, empty containers, toys and clogged rain gutters and French drains. Standing water should be eliminated promptly, as mosquitoes can grow from egg to adult in as little as seven days.

To report standing water or mosquito problems Dallas residents should call 3-1-1. For additional information on mosquito control, visit [www.dallascitynews.net/fightthebite](http://www.dallascitynews.net/fightthebite).
