Areas in Dallas to be sprayed for West Nile Virus

Dallas –Weather permitting; the areas delineated below are scheduled for mosquito control spraying on Tuesday, September 15, 2015 and Wednesday, September 16, 2015 between 9:00 p.m. and 5:00 a.m. on each night.

Control Areas: The areas to be sprayed are within the following general boundaries:

6800 block of Trammel Drive (75214): **Northwest Highway** on the north, **Abrams Road** on the west, **Lawther Drive** on the east and **Ravendale Lane** on the south.

11900 block of Woodbridge Drive (75243): **Shadow Way** on the north, **Oakshire Place** on the west, and **Bushmils Road** on the east and **Summertree Lane** on the south.

While the insecticide is approved by the Environmental Protection Agency for treatment, residents in the above areas should avoid contact with the spray by staying indoors. Persons inside a vehicle while trucks are actively spraying should remain in their vehicles with the windows up and the air conditioner on until the trucks pass and the spray is no longer visible. Persons out during the scheduled spraying time should be alert for trucks and should not follow them. Residents who come in contact with the spray are advised to wash the affected area thoroughly with soap and water. The spray breaks down quickly in the presence of sunlight and has no residual effect.

Protection against mosquito bites

Dallas residents are urged to take precautions against mosquito bites by reducing outdoor activity during evening and nighttime hours. Residents who are outside during these times should cover their arms and legs and use a mosquito repellent.

Prevent mosquito breeding

Residents should eliminate standing water to prevent mosquito breeding and the spread of West Nile Virus. Breeding places for mosquitoes include swimming pools that are not kept clean, stagnant ponds, pet watering dishes, birdbaths, potted plants, old tires, empty containers, toys and clogged rain gutters and French drains. Standing water should be eliminated promptly, as mosquitoes can grow from egg to adult in as little as seven days. To report standing water or mosquito problems Dallas residents should call 3-1-1.
