FOR IMMEDIATE RELEASE

Area in North Central Dallas to be sprayed for West Nile Virus; Mosquito pool in the area tested positive for the virus

Dallas – A mosquito pool was confirmed positive for West Nile Virus in the 5500 block of Northaven Road.

Weather permitting; mosquito control spraying will be conducted from 10 p.m. until 2:00 a.m. Saturday, August 31, 2013 and again on Sunday, September 1, 2013 from 10 p.m. until 2:00 a.m.

Control Area: The area to be sprayed is within an area bounded generally on the north by **Forest Lane**, on the west by **Leachman Circle**, bounded by **Royal Lane** on the south and **Preston Road** on the east.

While the insecticide is approved by the Environmental Protection Agency for treatment, residents in the above areas should avoid contact with the spray by staying indoors. Persons inside a vehicle while trucks are actively spraying should remain in their vehicles with the windows up and the air conditioner on until the trucks pass and the spray is no longer visible. Persons out during the scheduled spraying time should be alert for trucks and should not follow them. Residents who come in contact with the spray are advised to wash the affected area thoroughly with soap and water. The spray breaks down quickly in the presence of sunlight and has no residual effect.

Protection against mosquito bites

Dallas residents are urged to take precautions against mosquito bites by reducing outdoor activity during evening and nighttime hours. Residents who are outside during these times should cover their arms and legs and use a mosquito repellent.

Prevent mosquito breeding

Residents should eliminate standing water to prevent mosquito breeding and the spread of West Nile Virus. Breeding places for mosquitoes include swimming pools that are not kept clean, stagnant ponds, pet watering dishes, birdbaths, potted plants, old tires, empty containers, toys and clogged rain gutters & French drains. Standing water should be eliminated promptly, as mosquitoes can grow from egg to adult in as little as seven days. To report standing water or mosquito problems Dallas residents should call 3-1-1.
