

Stay on Guard at School

Protect teachers, coaches, classmates, school bus drivers, cafeteria workers and other essential workers by slowing the spread at school:

- Follow guidelines set in place by your school district
- Keep sick children home
- Children 2 years and older should wear a mask
- Encourage children to only touch their own school supplies and food instead of sharing
- Remind children not to use their friends' mask
- Practice hand hygiene during in-person learning
- Get tested prior to in-person learning and if exposed
