

To All Customers,

On September 21, 2022 the Dallas City Council authorized an additional fee of \$2.00 per ton for all Customers using the McCommas Bluff Landfill and Bachman Transfer Station. This fee will be added to your receipt as a separate line item called “Environmental Fee”. This fee is not a tax. Revenue generated from this fee will be set aside to fund the cost to close the landfill and transfer stations in the future when that becomes necessary. This fee is in line with fees charged by other landfills in the area for similar purposes. The published disposal rate for all non-contract customers will remain unchanged at \$37.67 per ton for McCommas Landfill Customers and \$61.58 per ton for those customers using the Bachman Transfer Station. The Environmental Fee will be assessed at a 1 ton minimum. This fee goes into effect on January 1, 2023.
