

**CITY OF DALLAS
FIRE COORDINATION CERTIFICATE**

Fire hydrant coverage/placement for subdivisions and new development /construction is an integral part of the design for water and wastewater systems and services. cursory review of the fire hydrant design by SD&C Water & Wastewater Engineering only focuses on appurtenance requirements (valves/service leads) and not fire protection requirements. It is important and required that the consulting engineer/architect or owner/developer coordinate the water plans and building plans with Building Inspection (BI) or in some cases with the Dallas Fire-Rescue(DF-R) Dept. to ensure that the development is in compliance with the fire codes regarding fire hydrant coverage. **It is the responsibility of the consultant/developer that existing fire hydrants are correctly shown and to insure that the development complies with the building/fire codes as to the number, accessibility and location of any new fire hydrants that are needed.**

Fire prevention coordination shall be completed prior to the second submittal to W/WW Engineering Section. The Fire Prevention Coordinator (320 E. Jefferson, Room 210, Dallas, Texas 75203, 463-323-5980) may be used as a resource, but is not required. Please include Architectural/Civil site plans and the attached checklist when coordinating with DF-R.

THE CONSULTANT ENGINEER, ARCHITECT, OR OWNER CONDUCTING THIS COORDINATION SHALL SIGN THIS CERTIFICATE.
