

DRAWING SHEET FILENAME FORMAT INSTRUCTIONS

Please follow the instructions below and refer to the example drawing sheet indices to ensure all required construction drawing sheets are successfully uploaded into the Electronic Plan Review System (EPRS).

Drawing Sheet Filename (Original Plan Set)

All drawing sheet files in the original plan set are to be in portable document format (*.pdf) and shall be given a filename in the following format with each filename identifier separated by underscores: [Page Number]_[AIA CAD Plan Layer]_[Sheet Number]_[Description].

Example: 000080_Arch_A3.00_WALL SECTIONS.pdf

- **Page Number:** Each filename shall begin with a six-digit page number. Drawing sheets are to be numbered sequentially every ten (10) numbers in the order they are listed on the drawing sheet index.
- **AIA CAD Plan Layer:** This identifier shall list the type of drawing in accordance with the AIA CAD Layer Guidelines (U. S. National CAD Standard, Version 5) for Level 1 Discipline Designators. The identifier can be abbreviated.
- **Sheet Number:** Each drawing sheet shall further be identified with a sheet number that conforms to the AIA CAD Layer Guidelines for Level 2 Discipline Designators. For example, food service or kitchen plans would have a sheet number beginning with 'QF' (Level 1 designation for Equipment; Level 2 designation for Food Service), not 'FS' or 'K'. The numbering sequence after the discipline designators will be at the discretion of the project architect.
- **Description:** Free-text title of drawing sheet with the total number of characters in the filename not to exceed 255 characters, including spaces.

Submitting Revisions

Refer to the plan review revisions and the final city-approved plan set index examples and note the following:

- New filenames in the same format as the original plan set are required for any new drawing sheets. Up to nine (9) new drawing sheets can be inserted between any two drawing sheets in the original plan set. However, no new drawing sheet can be placed before page number '000000'.
- If there will be ten (10) or more new drawing sheets to be incorporated into the original plan set, those sheets shall be placed at the end of the plan set and numbered accordingly.
- When submitting revisions to drawings sheets to address plan review comments in the original plan set, the exact same page number, AIA CAD plan layer and sheet number identifiers shall be used in the filename of the revised drawing sheet. The EPRS would then know to upload a *new version* of the *same* drawing sheet, instead of uploading an entirely new drawing sheet. The description identifier, however, can be changed if necessary.
- Revise and update the drawing sheet index as required.

Submitting Addendums

Submitting addendums to a city-approved plan set will be the same as for submitting plan review revisions. Refer to the addendum and the updated city-approved plan set index examples.
