Subject: RE: Posting of Received Public Comments
Attachments: Draft Letter for Rebuttal Comments Dallas I-Codes Posting Oct2022.docx

Good afternoon, All,

David, I revised to four (4) comments-adding the exception back into the code,;

"1004.5 Areas without fixed seating. The number of occupants shall be computed at the rate of one occupant per unit of area as prescribed in Table 1004.5 For areas without *fixed seating*, the occupant load shall be not less than that number determined by dividing the floor area under consideration by the *occupant load* factor assigned to the function of the space as set forth in Table 1004.5 Where an intended function is not listed in Table 1004.5, the *building official* shall establish a function based on a listed function that most nearly resembles the intended function.

[**SSE**exception: Where *approved by the building official*, the actual number of occupants for whom each occupied space, floor or building is designed, although less than those determined by calculation, shall be permitted to be used in the determination of the design *occupant load*.SS]"

With kindness,

James M. Metzgar, Sr., CBO
