For purposes of this provision, MAJOR RENOVATION means a building permit or series of building permits for the reconstruction, alteration, or modification of a building that increases the floor area that existed on April 22, 2015 by 50 percent or more.

(A) Additions up to 50 percent of permitted square footage. Floor area, building height, and any new construction must be developed according to the height regulations defined by each development type. The additional floor area, building height, and new construction are not required to fill the entire height regulations, but must be contained wholly within the buildable envelope. BUILDABLE ENVELOPE means the three dimensional form within which the horizontal and vertical elements of a structure must be built to comply with the use and placement requirements and with the height and elements requirements in Section 51A-13.304 for each development type.

(B) Additions more than 50 percent of permitted square footage. The site must come into complete compliance with Article XIII regulations.

Single-family garages are not required to have vehicular access from an alley.

(B) Detention center, jail, or prison. Detention center, jail, or prison is prohibited as a main use.

(A) Except as provided in this subsection, any on-street parking spaces may be counted as a reduction of the parking requirement of the use adjacent to the on-street parking space.

(i) An on-street parking space may not be used to reduce the required parking for more than one use, except that an on-street parking space may be used to reduce the combined total parking requirement of a mixed use project.

(ii) An on-street parking space that is not available to the public at all times of the day may only be counted as a partial parking space in proportion to the amount of time it is available. For example, a parking space that is available to the public only eight hours per day will be counted as one-third of a parking space ($8 \div 24 =$ one-third). The total of the limited-availability parking spaces will be counted to the nearest whole number, with one half counted as an additional space.

(B) All on-street parking must be approved as to design and construction by the director of public works and transportation. On-street parking must be striped in accordance with standard city specifications.

(7) Outdoor covered patios.

(A) For restaurant or bar uses, the outdoor covered patio area is not included in parking requirement calculations for up to 25 percent of the size of the indoor floor area.

(A) Remote parking for uses in these subdistricts may not be located outside the boundaries of the district.

(C) The building official shall extend the walking distance for remote parking to no more than 1,000 feet for up to 50 percent of the required off-street parking unless the extension would

(i) significantly discourage patrons of the use from using the remote parking;

(ii) unreasonable endanger the safety of persons or property; or

(iii) not otherwise be in the public interest.

(D) A license is required to authorize an extension of walking distance beyond 1,000 feet. The building official must require that either a shuttle or an attendant be provided by the applicant as a condition to approval of an extension of the walking distance for remote parking beyond 1,000 feet.

(4) On-street parking.

(A) Except as provided in this subsection, any on-street parking spaces may be counted as a reduction of the parking requirement of the use adjacent to the on-street parking space.

(i) An on-street parking space may not be used to reduce the required parking for more than one use, except that an on-street parking space may be used to reduce the combined total parking requirement of a mixed use project.

(ii) An on-street parking space that is not available to the public at all times of the day may only be counted as a partial parking space in proportion to the amount of time it is available. For example, a parking space that is available to the public only eight hours per day will be counted as one-third of a parking space (8÷24 = one-third). The total of the limited-availability parking spaces will be counted to the nearest whole number, with one half counted as an additional space.

(B) All on-street parking must be approved as to design and construction by the director of public works and transportation. On-street parking must be striped in accordance with standard city specifications.

(5) Master parking plan and floor area plan.

(A) Purpose. Because required off-street parking may be provided in remote locations within this subdistrict without a parking agreement, the Subdistrict H master parking and floor area plan supplement (Exhibit 468D) is required to calculate the amount of required off-street parking, identify available off-street parking, and ensure that each use within the subdistrict meets the off-street parking requirements.

(B) Master parking plan and floor area plan supplement.

(i) To maintain adequate required off-street parking, a master parking plan and floor area plan supplement must be submitted to and approved by the building official when:

(aa) a site plan is submitted;

(bb) required off-street parking spaces are relocated; or

(cc) required off-street parking spaces are added or removed.

(ii) A master parking plan and floor area plan supplement must include:

(aa) the number of existing required off-street parking spaces;

(bb) the number and location of required off-street parking spaces added, removed, or relocated;

(cc) the number and location of all parking spaces; and

(dd) a revised master parking plan and floor area plan that shows:

(1) changes to a site plan; and

(2) other changes to the master parking plan and floor area plan since the last update, including changes to floor area and revisions to streets, alleys, or private drives.

(iii) The building official shall maintain a copy of each approved master parking plan and floor area supplement.

(iv) The Property owner must deliver a copy of each approved master parking plan and floor area plan supplement to the director within five days after the building official's approval of each supplement.

(6) Public transit parking reduction.

(A) The off-street parking requirements for all uses except restaurant and alcoholic beverage establishments uses may be reduced by up to 10 percent if the use is within 1,200 feet, measured as a pedestrian would walk, of a DART light rail station at which DART light rail service is available with train headways at least every 20 minutes during the morning and evening peak periods (between 7:00 a.m. and 8:30 a.m. and between 4:30 p.m. and 6:00 p.m., Monday through Friday), or a DART bus stop or trolley stop at which DART bus service or trolley service is available with bus or trolley headways at least every 20 minutes during the morning and evening peak periods (between 7:00 a.m. and 8:30 a.m. and between 4:30 p.m. and 6:00 p.m., Monday through Friday).

(B) The off-street parking requirement for an office use may be reduced by three percent if the office use is within 1,200 feet, measured as a pedestrian would walk, from a DART commuter rail station at which DART commuter rail service is available or a DART bus stop or trolley stop where DART bus service or trolley service is available, during the morning and evening peak periods (between 7:00 a.m. and 8:30 a.m. and between 4:30 p.m. and 6:00 p.m., Monday through Friday). The total public transit parking reduction for an office use may not exceed 10 percent.

(7) Mixed use development parking reduction.

(A) In general.

(i) The off-street parking requirement for a mixed use development may be reduced in accordance with the mixed use development parking chart (Exhibit 468E).

(ii) This reduction may be used in combination with other parking reductions, except that the off-street requirement for a mixed use development may not be reduced by more than 30 percent.

(B) Calculation of adjusted off-street parking requirement. The adjusted off-street parking requirement for a mixed use development is calculated as follows:

(i) The off-street parking requirements for each of the uses in the mixed use development must be ascertained.

(ii) The parking demand for each use is determined for each of the six times of day shown in the mixed use development parking chart by multiplying the standard off-street parking requirement for each use by the percentage in the chart assigned to the category of use. If a use in the development does not fall within one of the categories shown in the mixed use development parking chart, the percentage assigned to that use is 100 percent for all six times of day unless other factors can be demonstrated by a parking study and approved by the building official.

(iii) The “time of day” columns are totaled to produce sums that represent the aggregate parking demand for the development at each time of day. The largest of these six sums is the adjusted off-street parking requirement for the development.

(iv) If one or more of the main uses in a mixed use development is a retail or personal service use, the minimum parking requirement for the mixed use development cannot be reduced to a number of spaces that is less than the sum of the standard parking spaces required for each of the retail and personal service uses in the mixed use development.

(8) Fees for required parking. Fees may be charged for required off-street parking if the required off-street parking is located within a parking structure.

(9) Below-grade parking structures. Below-grade parking structures may extend to the lot line and across lot lines within this subdistrict.

(10) Special exception. The board of adjustment may grant a special exception to reduce the number of required off-street parking spaces in accordance with Section 51A-4.311.

(i) Site design requirements.

(1) Surface parking screening. All surface parking must be screened from the street using one or more of the following methods to separately or collectively provide a minimum height of three and one-half feet above the parking surface:

(A) Earthen berm planted with turf grass or ground cover recommended for local area use by the director of park and recreation. The berm may not have a slope that exceeds one foot in height for each three feet of width.

(B) Solid wood or masonry fence or wall.

(C) Hedge-like evergreen plant materials recommended for local area use by the director of park and recreation. The plant materials must be located in a bed that is at least three feet wide with a minimum soil depth of 24 inches. Initial plantings must be capable of obtaining a solid appearance within three years. Plant materials must be placed 24 inches on center over the entire length of the bed unless a landscape architect recommends an alternative planting density that the building official determines is capable of providing a solid appearance within three years.

(2) Surface parking screening from single-family or duplex adjacency. One or more of the screening methods listed in Paragraph (1) must be used to provide screening to separate a surface parking area from an adjacent single family or duplex district. The screening must separately or collectively provide a minimum height of six feet above the parking surface.

(3) Off-street loading and garbage storage area screening.

(A) Off-street loading spaces and garbage storage areas for all uses except single family and duplex uses must be visually screened from:

(i) an abutting street; and

(ii) a single family or duplex district that is adjacent to or directly across an alley from the use.

(B) Screening must be at least six feet in height, measured from the horizontal plane passing through the nearest point of the off-street loading space or garbage storage area.

(C) Required screening must be constructed of:

(i) for off-street loading spaces, any of the materials described in Paragraph (1); and

(ii) for garbage storage areas, a solid wood or masonry fence or wall.

(D) Access through required screening may be provided only by a solid gate that equals the height of the screening. The gate must remain closed at all times except when in use.

(4) Screening of outdoor storage areas. Except for retail and personal service uses, all outdoor storage areas must be screened by an eight-foot-high solid screening fence, vegetation consisting of evergreen plant materials, or other alternatives deemed appropriate by the building official.

(5) Aboveground parking structures.

(A) Parking is permitted on any level of a structure. Except for the portions of an aboveground parking structure facing a mews or an alley, aboveground parking structures must comply with the following standards:

(i) Parking levels must be screened using vegetation, metal panels, or other architectural elements to obscure sloping ramps from view; or

(ii) Parking levels must be concealed in a structure with facade building materials similar in appearance to the main structure's facade.

(B) When fronting on a primary street, liner development must be provided along the street level of the aboveground parking structure.

(6) Highly reflective glass. Highly reflective glass may not be used as an exterior building material for more than 25 percent of a facade on any building or structure. For purposes of this subsection, highly reflective glass means glass with exterior visible reflectance percentages in excess of 27 percent. Visible reflectance is the percentage of available visible light energy reflected away from the exterior surface of the glass. (The higher the percentage, the more visible light reflected and the more mirror-like the surface will appear.)

(7) Block standards.

(A) Block layouts must generally conform as shown on the area regulating plan. Streets not shown on the regulating plan are allowed if they are needed to meet minimum block standards or create blocks with a block perimeter of less than 1,600 feet. Additional streets must be developed in accordance with one of the street sections identified in the streetscape standards.

(B) Block standards apply during the platting process if the existing parcel of land or block is greater than the block perimeters described in this section.

(C) Except as provided in this paragraph, block perimeters may not exceed 1,600 linear feet as measured along the inner edges of each street right-of-way, private street, mews, or designated fire lane which is accompanied by a pedestrian sidewalk on at least one side and available at all times to the general public. The block may be broken by a civic building or open space lot provided the lot containing the civic building or open space is at least 50 feet wide and provides perpetual pedestrian access through the block. Block perimeters may exceed 1,600 feet up to a maximum perimeter of 2,400 feet, if one or more of the following conditions apply:

(i) The block has at least one block face on a street not considered a minor street.

(ii) The block has a mid-block mews constructed in accordance with this article that connects to another street.

(iii) The block has a pedestrian passage available at all times to the public. The pedestrian passage must comply with the following conditions:

(aa) The pedestrian passage has a continuous delineated path that is a minimum of 10-feet wide;

(bb) The pedestrian passage contains lighting at an interval to ensure a minimum illumination on the surface of the path of no less than one-half footcandle; and

(cc) The passage may be partially covered by a structure only if the following conditions are met:

(I) the total covered portion of each pedestrian passage is not longer than 70 feet;

(II) the portions of the facade of the structure are treated architecturally the same as the adjoining building through the use of materials, colors and architectural style;

(III) the portion of the structure covering the pedestrian passage has a minimum setback of 15 feet (the portion of the passage within the setback must comply with the mews cross section as shown in the streetscape standards);

(IV) the portion of the pedestrian passage under the structure has a minimum clearance of 14 feet and contains a clearly demarcated continuous pedestrian passageway; and

(V) the area between the covered portion of the pedestrian path and the street is treated architecturally like a courtyard through changes in ground surface materials, colors, or textures.

(8) Street standards. Except as otherwise provided in this paragraph, streets and mews must comply with the minor streets and streetscape standards in 51P-468-106(d).

(A) Bulb-outs. Bulb-outs are required at all intersections, except where parking is used as a lane of traffic during peak hours.

(B) Crosswalks. Crosswalks must be delineated through the use of contrasting pavement, texture, material, or color.

(C) Building access. Building access must be provided as shown in the table of development standards. Maximum entrance spacing is 150 feet.

(9) Sidewalk standards for new construction.

(A) In general.

(i) Except as otherwise provided in this paragraph, sidewalks must comply with the minor streets and streetscape standards in 51P-468-106(d).

(ii) If a sidewalk is located in a front yard, a sidewalk easement must be provided to assure its availability to the public for pedestrian use.

(B) Location.

(i) Sidewalks must be located along the entire length of the street frontage.

(ii) Except for existing buildings that do not have room between the building and the street, sidewalks must be located as show in the streetscape standards. Sidewalks may be located farther from the projected street curb to the extent necessary to preserve existing trees or structures or to comply with landscaping requirements.

(C) Width.

(i) Sidewalks must comply with the streetscape standards.

(ii) For any required sidewalks not illustrated in the street standards, sidewalks must have a minimum width of four feet, unobstructed by any structures or landscaping except tree grates, utility poles, and service boxes.

(j) Landscaping.

(1) In general.

(A) Except as provided in this subsection, landscaping must be provided in accordance with Article X.

"Parkway" means the portion of a street right-of-way between the street curb and the lot line. An owner or tenant is not required to pay an initial or annual fee for this license, although a fee may be charged for issuance of a parkway landscape permit. This private license will not terminate at the end of any specific period, however, the city council reserves the right to terminate this license at will, by resolution passed by the city council, any time such termination becomes necessary. The determination by the city council of the need for termination is final and binding. The city shall become entitled to possession of the licensed area without giving any notice and without the necessity of legal proceedings to obtain possession when, in its judgment, the purpose or use of the license is inconsistent with the public use of the right-of-way or when the purpose or use of the license is likely to become a nuisance or a threat to public safety. Upon termination of the license by the city council, each owner or tenant shall remove all improvements and installations in the public rights-of-way to the satisfaction of the city.~~

The city is absolutely exempt from any requirements to make repairs or to maintain the landscaping, related amenities, or the premises. ~~(ii) Upon receipt of the application and any required fees, the building official shall circulate it to all affected city departments and utilities for review and comment. If, after receiving comments from affected city departments and utilities, the building official determines that the construction, planting, or other amenities proposed will not be inconsistent with and will not unreasonably impair the public use of the right of way, the building official shall issue a parkway landscape permit to the property owner; otherwise, the building official shall deny the permit.~~

~~(iii) A property owner is not required to comply with any parkway landscaping requirement of this article if compliance is made impossible due to the building official's denial of a parkway landscape permit.~~

~~(iv) A parkway landscape permit issued by the building official is subject to immediate revocation upon written notice if at any time the building official determines that the use of the parkway authorized by the permit is inconsistent with or unreasonably impairs the public use of the right of way. The property owner is not required to comply with any parkway landscaping requirement of this section if compliance is made impossible due to the building official's revocation of a parkway landscape permit.~~

SEC. 51P-468.11[9]. TRANSITIONAL USES. [~~SUBDISTRICT C -- LAKE CLIFF RESIDENTIAL AREA.~~

(a) Application. This section applies to Subdistricts B, C, D, E, F, and G only.

(b) Purpose. When a form district is initiated, it may not be possible to develop and completely transition the entire area at the inception. Transitional uses are intended to provide an opportunity for owners in a form district to make appropriate use of their Property during the interim period as the district develops. Transitional uses are intended to allow underutilized or vacant properties to have value between the effective date of this article and the time that full implementation of the zoning changes become practical and feasible with strict compliance. No transitional use is allowed without a specific use permit, which must contain a specific duration and which may, if necessary, provide regulations from this section to ensure compatibility of the use with surrounding uses.

(c) Specific use permit.

(1) The uses listed in Subsection (d) below are permitted as transitional uses subject to a specific use permit.

(2) A specific use permit approved for a transitional use must contain a specified duration, which may not exceed five years. A specific use permit for a transitional use is not subject to automatic renewal. No off-street parking reductions are permitted.

(3) A specific use permit approved for a transitional use may modify the following regulations of this section if the city council determines that no adverse impact on surrounding properties will result:

(A) Section 51A-13.302, "Height."

(B) Section 51A-13.304, "Development Types."

(C) Section 51A-13.305, "Building Elements."

(4) A specific use permit for a transitional use does not create nonconforming rights in the use, structure, or any modifications to the regulations. Upon expiration of the specific use permit, immediate compliance with all regulations of this article is required.

(5) No expiration for a specific use permit may occur while an application for renewal of the specific use permit is pending before the city plan commission or city council. If an application is pending at the end of the current time limit stated in the specific use permit ordinance, the time limit shall be extended as a matter of law:

(A) until the day following the next succeeding official agenda meeting of the city council after the council makes a final decision to deny the application; or

(B) if the city council votes to create a new time limit, until the effective date of the amending ordinance establishing the new time limit.

~~(1) Private license granted.~~

~~(A) The city council hereby grants a revocable, non-exclusive license to the owners, or with the written consent of the owner, to the tenants (“property owner”) of all property in this district for the exclusive purpose of authorizing compliance with the parkway landscaping requirements of this article. A property owner is not required to pay an initial or annual fee for this license, although a fee may be charged for issuance of a parkway landscape permit in accordance with the Dallas Building Code, or Paragraph (2) of this section. This private license shall not terminate at the end of any specific time period, however, the city council reserves and has the absolute right to terminate this license at will, by resolution passed by the city council, any time such termination becomes necessary. The determination by the city of the necessity for such termination shall be final and binding and the city shall become entitled to possession of the premises without giving any notice and without the necessity of legal proceedings to obtain possession whenever in its judgment the purpose or use of this license is inconsistent with the public use of the right of way or when the purpose or use of this license is likely to become a nuisance or a public safety issue. Upon termination of the license by the director, each property owner shall remove all improvements and installations in the public rights of way in a manner satisfactory to the director of public works and transportation.~~

~~(B) A property owner is not required to comply with any landscaping requirement if compliance is made impossible due to the director's revocation of a landscape permit or the revocation of the license granted herein affecting landscaping.~~

~~(C) Upon the installation of landscaping and related amenities, such as irrigation systems, in the public rights of way, the property owner shall procure, pay for, and keep in full force and effect commercial general liability insurance coverage with an insurance company authorized to do business in the State of Texas and otherwise acceptable to the city, covering, but not limited to, the liability assumed under the license granted herein, with combined single limits of liability for bodily injury and property damage of not less than \$1,000,000 for each occurrence, \$2,000,000 annual aggregate. Coverage under this liability policy shall be on an “occurrence” basis and the city shall be named as additional insured. Proof of such insurance shall be sent to: Office of Risk Management, City of Dallas, 1500 Marilla, 1/C/North, Dallas, Texas 75201 and the policy shall provide for 30 days prior written notice to the Office of Risk Management of cancellation, expiration, non-renewal or material change in coverage. All subrogation rights for loss or damage against the city are hereby waived to the extent same are covered by this liability insurance policy.~~

~~(D) Each property owner shall be responsible for maintaining the landscaping and related amenities in good repair and condition and to keep the premises safe and from deteriorating in value or condition, at no expense to the city, and the city shall be absolutely exempt from any requirements to make repairs or to maintain the landscaping and related amenities. The granting of a license for landscaping and related amenities under this section does~~

~~not release the property owner from liability in the installation or maintenance of trees, landscaping, and related amenities in the public right-of-way.~~

~~(2) Parkway landscape permit.~~

~~(A) It is the responsibility of the property owner to apply for and obtain a parkway landscape permit before locating trees, landscaping, or related amenities in the parkway. An application for a parkway landscape permit must be made to the director of public works and transportation before an application for a building permit is made for work on the lot. The application must be in writing on a form approved by the director and accompanied by plans or drawings showing the area of the parkway affected and the planting or other amenities proposed.~~

~~(B) Upon receipt of the application and any required fees, the director shall circulate it to all affected city departments and utilities for review and comment. If, after receiving comments from affected city departments and utilities, the director determines that the construction and planting or other amenities proposed will not be inconsistent with and will not unreasonably impair the public use of the right of way, the director shall issue a parkway landscape permit to the property owner; otherwise, the director shall deny the permit.~~

~~(C) A property owner is not required to comply with any parkway landscaping requirement of this article if compliance is made impossible due to the director's denial of a parkway landscape permit.~~

~~(D) A parkway landscape permit issued by the director is subject to immediate revocation upon written notice if at any time the director determines that the use of the parkway authorized by the permit is inconsistent with or unreasonably impairs the public use of the right of way. The property owner is not required to comply with any parkway landscaping requirement of this article if compliance is made impossible due to the director's revocation of a parkway landscape permit.~~

~~(E) The issuance of a parkway landscape permit under this paragraph does not excuse the property owner, his agents, or employees from liability in the installation or maintenance of trees or other amenities in the public right of way.~~
