

Parking: Parking Ratios Table and Regulations Options (part 2)**Planners: Andreea Udrea, PhD, AICP
Lori Levy, AICP**

Consideration of amending off-street parking and loading requirements including, but not limited to, hotel, restaurant, multifamily, alcoholic beverage establishment, and public and private school uses in the Dallas Development Code.

BACKGROUND:

On September 5, 2019, City Plan Commission (CPC) authorized a public hearing to consider amending Chapters 51 and 51A of the Dallas Development Code, with consideration to be given to amending off-street parking and loading requirements including, but not limited to, hotel, restaurant, multifamily, and alcoholic beverage establishment uses, and transit-oriented development.

The intent of this code amendment is to review the current parking regulations and based on research, best practices, and other cities approach to parking requirements, determine the need to amend the City Code and make a recommendation and proposal.

Staff will provide reports on the following general research direction to build on information, culminating with recommendations and a proposal:

- Current Parking Regulations _ provided at the June 18, 2020 ZOAC meeting
- City of Dallas Planned Development Districts _ provided at the July 9, 2020 ZOAC meeting
- Index Cities and Other Cities Research _ provided at the August 6, 2020 ZOAC meeting
- Local and National Parking Studies _ provided at the September 3, 2020 ZOAC meeting
- Board of Adjustment parking reductions _ provided at the September 3, 2020 ZOAC meeting
- Citywide Plans – Vision/Goals _ provided at the September 3, 2020 ZOAC meeting
- Public and Interdepartmental Outreach – Input _ provided at the October 15, 2020 ZOAC meeting
- Case studies _ provided at the November 5, 2020 ZOAC meeting
- Discussion with City Departments _ at the November 19 and December 3, 2020 meetings
- Parking Regulations Proposal Framework Options _ provided at the January 21, 2021 ZOAC meeting
- Parking Ratios Table Options_ provided at the February 4, 2021 ZOAC meeting
- **Parking Ratios Table and Regulations Options – part 2_ provided at the February 18, 2021 ZOAC meeting**

PROJECT WEBPAGE:

<http://bit.ly/CityOfDallasParking>

RESEARCH AND STAFF ANALYSIS

Scope and methodology

At the January 21, 2021 meeting, staff presented the general framework options for a parking proposal. The framework is proposed to be sustained by five pillars:

1. **Areas with required parking + Exemptions**
2. **Parking ratios table + Regulations**
3. **Proximity to transit**
4. **Parking management tools**
5. **Parking design standards**

The general proposal for the first pillar for areas with required parking and exceptions was generally accepted, depending on future details and research necessary in the overall parking regulations section.

Minimum parking requirements for certain uses located in an R, D, and potentially TH zoning districts or within a 330-foot buffer around those districts must be provided according to the parking ratio table.

For all other uses, located outside the 330-foot buffer, no minimum parking spaces are required.

Furthermore, the following are excepted from parking ratio requirements, regardless of use and location:

- *Properties designated as historic and cultural landmark by the Landmark Preservation Officer or the Landmark Commission, or highly significant endangered, or listed on the National Register of Historic Places are not subject to the required off-street parking requirements set forth in this section.*
- *Buildings built prior to March 17, 1965, are not subject to the required off-street parking requirements set forth in this section.*
- *No parking is required for the first 5,000 square feet of each business establishment.*

Based on the agreed timeline, the next pillar, the required parking ratios (table) and regulations, is included in this report. At the February 4, 2021 meeting discussions regarding adequate parking ratio for residential uses led to necessary additional consideration and possible scenarios for residential parking. The report includes options and information to support the continuation of the discussion.

Following the proposed general framework and based on research adjusted to City of Dallas particularities, staff is proposing the following options for parking ratios and regulations where parking is required.

Appendices included in the report

1. Comparison Table: Proposed versus Current Parking Regulations per Code
2. Current Off-Street Parking Reductions and Special Parking Regulations – excerpts from Chapter 51A
3. Table: Zoning Districts Regulations for Residential Districts – per Chapter 51A
4. Scenarios to be Considered for Parking Requirements for Residential Uses
5. *Other Cities: Parking Requirements for Residential Uses (to be provided by 2.16.2021 as separate addition to the report)*

Purpose statement to be considered for the parking section

The standards are designed to encourage and accommodate a multi modal transportation system. The intent is to reasonably accommodate the parking needs of development, balanced by the needs of pedestrians, bicyclists, and transit users, and by the preservation of community character. The standards intend to incorporate the full range of parking, transportation, and demand management strategies to improve not only access, but to also enhance and promote walkable urban environments.

PARKING RATIOS AND REGULATIONS

Quantitative requirements where applicable

When uses are allowed by Specific Use Permit (SUP) or subject to Development Impact Review (DIR), the uses are not subject to the required off-street parking requirements set forth in the parking table, but shall use the table as a guide in considering provided parking as part of the SUP and DIR. Site accessibility will be regulated case by case through the SUP or DIR process based on existing specified criteria in the code.

In the case of a use not shown in the Table, the requirements for off-street parking will be determined based on the requirements for the most comparable use.

If parking is provided at a percentage to be determined, above the required ratio, additional standards may apply (Parking Design Standards).

Revised Parking Table

Rationale: The intent is to simplify and include ratios per use category, rather than for each use, but detail certain uses where necessary. When proposing the options for ratios, staff analyzed each use, the complexities of its operation, where it is allowable and if there are additional review processes for the use, the possibility to add a review layer to certain situations (DIR), the proximity to residential districts, best practices in other cities, and the overall intent of the code amendment.

Other cities: broad array of approaches based on desired outcomes and specificity of each city, but an observed overall trend is to significantly simplify and reduce ratios, and with a focus on eliminating parking minimums for multifamily uses, either in certain districts, or within a certain radius from transit stations. Cities usually have ratios per districts, have both minimums and maximums, or city-wide or for specific areas.

The ratios specified in the following table are applicable to uses located in an R, D, and potentially TH or within a 330-foot buffer around the districts.

Where use is allowable by SUP or DIR, access to the site, including parking if necessary, will be reviewed through the SUP or DIR process.

Parking ratios are per square feet of floor area.

**Shopping center: is a multitenant building that is greater than 20,000 square feet in floor area.*

Highlights on changes from the last report

(See appendix table with comparison between proposed and current quantitative parking requirements per use)

Uses	Proposed ratio
1. Agricultural Uses	None.
Urban gardens	None. If sales area is provided: ratio per retail uses for the sales portion (1/300sf)
Uses	Proposed ratio
2. Commercial and Business Service Uses	None
3. Industrial Uses	None
4. Institutional and Community Service Uses	None
5. Lodging Uses	None For hotel, motel, extended stay hotel or motel - for restaurant, meeting or event space provided above 50sf/room:1/300sf
6. Miscellaneous Uses	None
7. Office Uses	None Surgical center: none If office, other than a surgical center, in a *shopping center: 1/300sf
8. Recreation Uses	None
Country club with private membership	None. If in a *shopping center: 1/300sf
Private recreation center, club, or area	None. If in a *shopping center: 1/300sf
9. Residential Uses	1/DU <i>(for other options, to be read together with Appendix 4)</i>
Residential Hotel Retirement Housing	None
10. Retail and Personal Service Uses	
Bar, lounge, or tavern and private club-bar Microbrewery, micro-distillery, or winery Business school Commercial amusement (inside) Amusement center Bingo Parlor Bowling alley Children's amusement center Dance hall Motor track Skating rink Other (commercial amusement inside) uses Commercial amusement (outside) Dry cleaning or laundry store General merchandise or food store < 3,500sf General merchandise or food store >3500sf General merchandise or food store > 100,000sf Household equipment and appliance repair Liquor store	1/300sf

Paraphernalia Shop Pawn shop Personal service use Restaurant without drive-in or drive-through service Swap or buy shop	
Uses	Proposed ratio
Ambulance service Auto service center Business school Car wash Commercial motor vehicle parking Commercial parking lot or garage Drive-in theater Liquefied natural gas fueling station Motor vehicle fueling station Outside sales Restaurant with drive-though Surface parking Temporary retail use Taxidermist Temporary retail use Theater Truck stop Vehicle display, sales and services	None
Animal Shelter or Clinic (with or without outside runs)	None If in a *shopping center: 1/300sf
Nursery, garden shop, or plant sales Furniture store	1/1,000sf If in a *shopping center: 1/300sf
11. Transportation Uses	None
12. Utility and Public Service Uses	None
13. Wholesale, Distribution and Storage Uses	None
14. Accessory Uses	None

Appendix No. 1 includes a complete list of uses under each use category, the districts where the use is allowed by right or by Specific Use Permit (SUP), and where it requires additional review process by Development Impact Review (DIR) or Residential Adjacency Review (RAR), the required parking ratio per Chapter 51A and Chapter 51, **and the proposed ratios per the above table, for comparison purposes.**

Information and requirements of the **Specific Use Permit (SUP)** process can be found in the code in Section 51A-4.219, at the following link:

https://codelibrary.amlegal.com/codes/dallas/latest/dallas_tx/0-0-0-28030

Information and requirements of the **Development Impact Review (DIR)** process can be found in the Division 51A-4.800 of the code, at the following link:

https://codelibrary.amlegal.com/codes/dallas/latest/dallas_tx/0-0-0-28030

Information and requirements of the **Residential Adjacency Review (RAR) process** can be found in the Division 51A-4.803(d)(2) Site Plan Requisites – Residential Adjacency Items and 51A-4.803(f)(3), at the following link:

https://codelibrary.amlegal.com/codes/dallas/latest/dallas_tx/0-0-0-28030

Potential changes to existing review process for Specific Use Permit (SUP) and Development Impact Review (DIR) to be considered if necessary:

Where a use is allowed by SUP / DIR, the following factors may be considered in determining the adequate site accessibility and off-street parking:

- Accessibility of the site to prioritize alternative modes of transportation and shared parking, and discourage single-occupancy trips, traffic increase, and parking exceeding demand and site and location particularities.
- Parking requirements should be balanced with an active pedestrian network to minimize pedestrian, bicycle, and vehicle conflicts as much as possible.
- Documentation regarding the actual parking demand for the proposed use.
- The impact of the proposed use on the parking and roadway facilities in the surrounding area.
- Whether the proposed use is located near a parking area that is available to the customers, occupants, employees, and guests of the proposed use.
- The availability of alternative forms of transportation and actions being taken by the applicant to enhance or promote those alternatives.

Parking regulations

Rationale: Simplify process and encourage mixed-use, shared parking, and walkability.

Remote Parking

- Depending on the agreed ratios and outcomes of the testing phase of the general framework, a possible increase in distance allowed for remote parking can be considered if necessary: the parking may be located within a walking distance of X feet from the use served by the remote parking unless an extension of walking distance is approved.
 - o *Rationale: currently code allows 300 feet, 600 feet as extension in certain cases, beyond 600 with license.*
 - PDs: 1,000 feet and 1,500 feet; 500 feet and 1,000 feet.*
 - Other cities: 500 feet, 600 feet, 1,000 feet*

Shared Parking

To be determined after testing options.

Information and requirements of the **Remote Parking and Shared Parking** can be found in the Division 51A-4.320, at the following link:

https://codelibrary.amlegal.com/codes/dallas/latest/dallas_tx/0-0-0-35099

Appendix No. 2 includes excerpts from Chapter 51A for Special Parking – Remote and Shared Parking and for Parking Reductions

Drop-off / Pick-up Spaces / Passenger Loading Zones

- One of the following may be required for all nonresidential uses regardless of location: carpool/vanpool parking and/or rideshare / car-sharing parking and/or passenger loading areas.

Certain triggers for this requirement may have to be considered. The determination for this requirement will be decided after testing the options.

- ADA parking spaces required for all nonresidential uses, regardless of location.

Parking reduction options

To be determined after testing options.

- Depending on the agreed ratios and outcomes of the testing phase of the general framework, a possible increase in parking reductions can be considered to allow administrative reductions for up to 50% of the required parking and the Board of Adjustment for up to 100% of the required parking.

Information and requirements of the **Parking Reductions** can be found in the Division 51A-4.310, at the following link:

https://codelibrary.amlegal.com/codes/dallas/latest/dallas_tx/0-0-0-35149

Appendix No. 1 includes excerpts from Chapter 51A for Special Parking – Remote and Shared Parking, and Parking Reductions

APPENDIX 1 - COMPARISON PROPOSED VS CURRENT PARKING RATIOS PER CODES

USE	Allowable	PROPOSED	Chapter 51A	Chapter 51
4.201 AGRICULTURAL USES				
Animal Production	<i>in A(A) SUP: in non-r (text)</i>	None	2 spaces	Farm or ranch: min 2ps Animal pound: 1/500sf Zoo: 1/600sf Hatchery and breeding operations: 1/600sf Slaughterhouse: 1/1,000sf outdoors; 1/500sf or min 5 indoors

APPENDIX 2 - CURRENT OFF-STREET PARKING REDUCTIONS AND SPECIAL PARKING REGULATIONS – SELECTED EXCERPTS FROM CHAPTER 51A

Division 51A-4.310. Off-street parking reductions.

https://codelibrary.amlegal.com/codes/dallas/latest/dallas_tx/0-0-0-35149

SEC. 51A-4.311. SPECIAL EXCEPTIONS.

(a) Special exception: parking demand.

(1) The board may grant a special exception to authorize a reduction in the number of off-street parking spaces required under this article if the board finds, after a public hearing, that the parking demand generated by the use does not warrant the number of off-street parking spaces required, and the special exception would not create a traffic hazard or increase traffic congestion on adjacent or nearby streets. Except as otherwise provided in this paragraph, the maximum reduction authorized by this section is 25 percent or one space, whichever is greater, minus the number of parking spaces currently not provided due to delta credits, as defined in Section [51A-4.704\(b\)\(4\)\(A\)](#). For the commercial amusement (inside) use and the industrial (inside) use, the maximum reduction authorized by this section is 75 percent or one space, whichever is greater, minus the number of parking spaces currently not provided due to delta credits, as defined in Section [51A-4.704\(b\)\(4\)\(A\)](#). For the office use, the maximum reduction is 35 percent or one space, whichever is greater, minus the number of parking spaces currently not provided due to delta credits, as defined in Section [51A-4.704\(b\)\(4\)\(A\)](#). Applicants may seek a special exception to parking requirements under this section and an administrative parking reduction under Section [51A-4.313](#). The greater reduction will apply, but the reductions may not be combined.

(...)

(7) The board shall not grant a special exception under Paragraph (1) to reduce the number of off-street parking spaces required for a commercial amusement (inside) used as a dance hall.

(...)

SEC. 51A-4.313. ADMINISTRATIVE PARKING REDUCTION.

(a) The director may grant a reduction in the number of off-street parking spaces required under this article for specific uses if the director finds that the parking demand generated by the use does not warrant the number of off-street parking spaces required, and the reduction would not create a traffic hazard or increase traffic congestion on adjacent or nearby streets. The maximum reduction authorized by this section for specific uses is:

Use	Maximum Administrative Reduction
Industrial (inside)	50 percent
Industrial (outside)	50 percent
Office uses and retail and personal service uses (except for restaurants and alcoholic beverage establishments) within a 1,200 feet walking distance of a platform of a rail transit station	20 percent (must not be within 600 feet of a single-family or duplex district and the use must be connected to the rail transit station by a sidewalk with a minimum width of six feet)
Trade center	25 percent
Warehouse greater than 100,000 square feet	50 percent (up to 75 percent if the requirement of Subsection (d)(3) is complied with)
Museum/art gallery	50 percent
Note: Applicants may seek a special exception to parking requirements under Section 51A-4.311 and an administrative parking reduction under this section. The greater reduction will apply, but the reductions may not be combined.	

(...)

SEC. 51A-4.314. REDUCTIONS FOR PROVIDING BICYCLE PARKING.

(a) Required off-street parking may be reduced by one space for every six Class I bicycle parking spaces provided on a building site. Bicycle parking spaces required by Section [51A-4.333](#) count toward this parking reduction. A minimum of 20 off-street parking spaces must be required in order to receive a parking reduction of one space.

(b) Required off-street parking may be reduced by one space for every four Class II bicycle parking spaces provided on a building site. Bicycle parking spaces required by Section [51A-4.333](#) count toward this parking reduction. A minimum of 20 off-street parking spaces must be required in order to receive a parking reduction of one space.

(c) A parking reduction under this subsection may not be granted for fractional parking spaces and fractional parking spaces may not be rounded up to the next nearest whole parking space.

(d) A parking reduction granted under Subsections (a) or (b) cannot exceed five percent of the total required off-street parking spaces for a building site.

(e) In addition to a parking reduction granted under Subsections (a) or (b), required off-street parking spaces may be reduced by an additional five percent by providing showers, lockers, and changing facilities for bicycle riders. This parking reduction is not available for residential and retail and personal service uses. (Ord. 29128)

Division 51A-4.320. Special Parking Regulations.**SEC. 51A-4.321. DEFINITIONS.**

In this division:

(...)

(4) REMOTE PARKING means off-street parking provided on a lot not occupied by the main use.

(5) SHARED PARKING means the use of the same off-street parking stall to satisfy the off-street parking requirements for two or more uses.

(6) SHUTTLE means a vehicle used to transport patrons between the drop-off point at the main use and the remote parking lot serving the use.

(7) SPECIAL PARKING means packed parking, remote parking, and shared parking as those terms are defined in this section.

(8) WALKING DISTANCE means the distance from the nearest point of the special parking lot to the nearest public entrance of the main use, measured along the most convenient pedestrian walkway. (Ord. Nos. 19786; 21660)

(...)

SEC. 51A-4.323. PROCEDURES FOR SPECIAL PARKING APPROVAL.

(a) In general. All special parking must be approved by the building official in accordance with this division. A person seeking approval of special parking shall submit an application to the building official pursuant to Subsection (b).

(b) Application. An application for special parking approval must be filed with the building official. An application form may be obtained from the building official. The application must include the following:

(1) The application fee.

(2) A site plan illustrating the applicable items listed in Subsection (c).

(3) For packed parking, a statement describing the operational plan, including:

(A) the days and hours of operation of the main use;

(B) staffing required to park the vehicles; and

(C) the location of any parking service stand.

(4) For remote parking:

(A) a map illustrating the walking distance from the special parking to the use providing the parking; and

(B) if applicable, a statement pointing out the factors justifying an extension of walking distance including discussion of the following factors:

(i) The type of use involved.

(ii) The parking demand generated by the use involved.

- (iii) The percentage of required off-street parking that will be provided as remote parking.
 - (iv) The availability and condition of sidewalks.
 - (v) The availability and frequency of a local shuttle or transit service.
 - (vi) The availability of or proposal for shelters for users of any local shuttle or transit service.
 - (vii) Any other factors that may have the effect of encouraging patrons of the use to use or discouraging patrons of the use from using the remote parking.
- (5) For shared parking, a study of parking demand and accumulation during all days and hours of operation for all uses sharing parking.
- (6) Any other reasonable and pertinent information that the building official determines to be necessary for special parking review.
- (c) Site plan requisites.
- (1) The following information must be illustrated on the site plan:
 - (A) The number of parking spaces required for each use.
 - (B) The location and dimensions of the special parking lot.
 - (C) The location and dimensions of all existing and proposed off-street parking and loading areas, parking bays, aisles, and driveways.
 - (D) The location and dimensions of any dumpster on the special parking lot.
 - (E) The number of cars to be accommodated in each row of parking spaces.
 - (F) The location and dimensions of all existing streets and alleys adjacent to the special parking lot and between the special parking lot and the main use.
 - (G) The location of all existing easements for street purposes on the special parking lot.
 - (H) Existing and proposed provisions for pedestrian circulation in the area of request, including sidewalks, walkways, crosswalks, and pedestrian plazas.
 - (I) Existing and proposed median cuts and driveways located within 250 feet of the special parking lot.
 - (J) The location and the type of any special traffic regulation facilities proposed or required.
 - (K) A proposed landscape plan, if required elsewhere in this chapter.
 - (2) For special parking consisting of more than 50 parking spaces, the following additional information must be illustrated on the site plan:
 - (A) Existing and proposed points of ingress and egress and estimated peak hour turning movements to and from existing and proposed public and private streets and alleys adjacent to the special parking lot.
 - (B) Average daily traffic counts on streets adjacent to the special parking lot.
 - (C) Estimated peak hour turning movements at intersections located within 250 feet of the special parking lot.
- (Ord. Nos. 19786; 21660; [30892](#))

SEC. 51A-4.324. REVIEW BY THE DIRECTOR.

- (a) Conformity with standards required. The building official shall deny an application for special parking unless it meets all of the applicable standards in this section.
- (b) General standards.
 - (1) Special parking may not be located in a residential district, except that Chapter 51 community service, religious, and educational uses, and [Chapter 51A](#) institutional and community service uses may share parking in residential districts on the same lot where both uses are located. Nonresidential uses in residential districts may also use special parking if the special parking is not located in a residential district.
 - (2) Except as otherwise expressly provided in this subsection, special parking may not account for more than 50 percent of the off-street parking required for any use.
 - (3) The 50 percent limitation in Paragraph (2) does not apply to:
 - (A) remote parking within a walking distance of 300 feet of the main use; and
 - (B) shared parking on the same lot as the main use if all uses sharing the parking have mutually exclusive hours of operation.
 - (4) Special parking must comply with all codes, ordinances, rules, and regulations of the city.
 - (5) Special parking may not create safety hazards.

(c) Packed parking standards. Packed parking may not be used unless a license is obtained pursuant to Section [51A-4.329](#).

(d) Remote parking standards.

(1) Walking distance. Remote parking must be located within a walking distance of 300 feet from the use served by the remote parking unless an extension of walking distance is approved by the building official.

(2) Extension of walking distance.

(A) The building official may extend the walking distance for remote parking to no more than 600 feet unless the extension would:

(i) significantly discourage patrons of the use from using the remote parking;

(ii) unreasonably endanger the safety of persons or property; or

(iii) not otherwise be in the public interest.

(B) A license is required to authorize an extension of walking distance beyond 600 feet. (See Section [51A-4.329](#).)

(...)

(e) Shared parking standards. Uses sharing parking must have either mutually exclusive or compatibly overlapping normal hours of operation. The building official shall determine whether hours of operation are compatibly overlapping on a case by case basis. (Ord. Nos. 19786; 21660; 25290; 27404)

(...)

SEC. 51A-4.329. SPECIAL PARKING LICENSE.

(a) When a special parking license is required.

(1) A special parking license is required to authorize:

(A) packed parking; or

(B) an extension of the walking distance for remote parking beyond 600 feet [See Section [51A-4.324\(d\)](#)].

(2) Special parking licenses are issued by the building official. An application for special parking under Section [51A-4.323](#) serves as an application for a license under this section.

(b) Conformity with standards required. The building official shall deny a special parking license unless it meets all of the applicable standards in Section [51A-4.324](#) and this section.

(...)

(d) Standards for extension of walking distance beyond 600 feet.

(1) The building official shall require that either a shuttle or an attendant be provided by the applicant as a condition to approval of an extension of the walking distance for remote parking beyond 600 feet.

(2) If a shuttle is required, it must:

(A) transport patrons between the main use and the remote parking lot;

(B) be adequately staffed during all hours of operation of the main use; and

(C) have adequate seating capacity to accommodate patrons expected to use the remote parking.

(3) If an attendant is required, the attendant shall drive vehicles of patrons between the main use and the remote parking lot.

(4) In no event may the building official authorize remote parking to be located beyond a walking distance of one-half mile from the main use.

Additional information, selected excerpts from Chapter 51A, current regulations
Division 51A-4.200. Use Regulations**SEC. 51A-4.209. RESIDENTIAL USES****(2) Duplex.**

(A) Definition: Two dwelling units located on a lot.

(B) Districts permitted: By right in duplex, townhouse, CH, MF-1(A), MF-1(SAH), MF-2(A), MF-2(SAH), central area, and mixed use districts. By right as a restricted component of a building in the GO(A) district. [See Section [51A-4.121\(d\)](#).]

(C) Required off-street parking: Two spaces per dwelling unit.

(5) Multifamily.

(A) Definitions: Three or more dwelling units located on a lot.

(B) Districts permitted: By right in CH, multifamily, central area, mixed use, and urban corridor districts. By right as a restricted component of a building in the GO(A) district. [See Section [51A-4.121\(d\)](#).]

(C) Off-street parking.

(i) Required off-street parking: One space per bedroom with a minimum of one space per dwelling unit. An additional one-quarter space per dwelling unit must be provided for guest parking if the required parking is restricted to resident parking only. No additional parking is required for accessory uses that are limited principally to residents.

(ii) The number of off-street parking spaces required under this subparagraph may be reduced to provide adequate area for the placement of recycling containers in accordance with Section 18-5.1(e) according to the following table:

No. of Dwelling Units	No. of Required Parking Spaces Reduced
8-100	3
101 - 400	3% or 6, whichever is less
401 +	9

This parking reduction only applies to structures built before August 12, 2020.

(6) Single family.

(A) Definition: One dwelling unit located on a lot.

(B) Districts permitted: By right in agricultural, single family, duplex, townhouse, CH, MF-1(A), MF-1(SAH), MF-2(A), MF-2(SAH), MH(A), central area, MU-1, and MU-1(SAH) districts. By right as a restricted component of a building in the GO(A) district. [See Section [51A-4.121\(d\)](#).]

(C) Required off-street parking: One space in R-7.5(A), R-5(A), and TH districts; two spaces in all other districts.

APPENDIX 4 - SCENARIOS TO BE CONSIDERED FOR PARKING REQUIREMENTS FOR RESIDENTIAL USES

- *to be read and discussed together with APPENDIX 3 - ZONING DISTRICTS REGULATIONS FOR RESIDENTIAL DISTRICTS – PER CHAPTER 51A*

For all scenarios, additional tools needed; timing and implementation may vary depending on the scenario:

- Tools to regulate on-street parking and support additional mobility needs:
 - o *Residential Permit Only (RPO) process streamlined, updated metering and curb management tools.*
 - o *New parking (transportation) management tools: Parking Benefit Districts, Parking Management Districts where applicable.*
 - o *Correlation with priority investment areas to ensure supporting infrastructure, street design, or other necessary programs.*
- Possible updates to the current site access standards.
- Impact analysis metrics to help supervise the outcomes and collect data that will enable future necessary adjustments.

SCENARIO 1

- 1. No minimum (or further reduced) required parking for all housing types within all districts where residential uses are allowable, regardless of location.**

What districts will apply:

- *All districts where residential use (single family, duplex, multifamily) is allowed (R, D, TH, CH, MF, MU, CA, UC).*

Ratios that will still apply in this scenario:

- *Only certain non-residential uses located in the 330-foot buffer will have minimum parking requirements.*

SCENARIO 2 (and variant 2.1)

- 2. No minimum (or further reduced) required parking for all housing types within some selected districts (R-7.5, R-5, D, CH, TH, MF-1, MF-2), regardless of location.**

What districts will apply:

- *All housing types (single family, duplex, multifamily) allowable within R-7.5, R-5, D, TH, MF-1, MF-2, CH.*

Ratios that will still apply in this scenario:

- *Residential uses: 1 parking space/DU within R-1Ac, R-1/2Ac, R-16, R-13, R-10, and*
- *Certain uses located in the R, D, TH districts and within the 330-foot buffer around them will have minimum parking requirements.*

2.1 Variation or combination: No minimum (or further reduced) required parking for certain housing types (between 2DU/lot and 10DU/lot) where allowable.

What districts will apply:

- *Housing types from 2DU/lot to 10DU/lot (duplex and low-density-multifamily) as allowable within D, TH, MF-1, MF-2, CH, MU, CA, UC.*

Ratios that will still apply in this scenario:

- *Residential uses 1 parking space/DU within R-1Ac, R-1/2Ac, R-16, R-13, R-10, R-7.5, R-5, and*
- *Certain non-residential uses located in the R, D, TH and within the 330-foot buffer will have minimum parking requirements.*

SCENARIO 3

3. No minimum (or further reduced) required parking for all types of housing types within all districts, including all types of residential districts, in certain locations:

- a. **Proximity to transit, and**
- b. **Within a certain buffer around certain commercial districts - retail, office, mixed use, multiple commercial, and central area (or)**
 - b.1 **Within the 330-foot buffer around R, D, TH**

What districts will apply:

- *All zoning districts restricted to certain locations.*

Ratios that will still apply in this scenario:

- *Residential uses 1 parking space/DU outside the specified location, and*
- *Certain uses located in the R, D, TH and within the 330-foot buffer will have minimum parking requirements.*

SCENARIO 4

4. Exception for parking requirements for building sites prior to March 1965 and less than X feet in width.

*(*The proposed framework includes exceptions for historical districts and buildings, and for all buildings built prior to March 1965 that will apply to residential uses too)*

What districts will apply:

- *All zoning districts restricted to very specific criteria.*

Ratios that will still apply in this scenario:

- *Residential uses 1 parking space/DU within all R, D, TH and within the 330-foot buffer around them, and*
- *Certain non-residential uses located within the R, D, TH and within the 330-foot buffer will have minimum parking requirements.*

SCENARIO 5**5. Overall parking ratio of 1 parking space/DU for all residential types in R, D, TH and 330-foot buffer**

What districts will apply:

- *All R, D, TH districts and within the 330-foot buffer where the use is allowable.*

Ratios that will still apply in this scenario:

- *Residential uses 1 parking space/DU within all R, D, TH and within the 330-foot buffer around them, and*
- *Certain non-residential uses located within the R, D, TH and within the 330-foot buffer will have minimum parking requirements.*

General criteria to be considered when discussing each scenario:

Pros:

- *Allows flexibility and opens us the entire range of options for housing choices regardless of the location.*
- *Creates a variety in zoning districts.*
- *Allows flexibility for design for the gentle densifiers of the housing options – encourages the missing middle housing.*
- *Includes housing options for categories that have different needs (ageing in place, multigenerational neighborhoods, ...).*
- *Supports different types of infill housing and has the potential to bring housing, jobs, supporting services, and commercial closer freely – a crucial structure for different, gently denser, development patterns and communities; hence shortening the distances and possibly eliminating the need for long-distance commuting.*
- *Allows solutions for efficient use of existing parking supply, thus supporting walkability and bike-ability.*
- *Support and relief for older building sites that encounter design constraints to comply with parking requirements.*
- *Helps the preservation of the older neighborhood character.*
- *Allows site design options that support a good street presence and activation, walkability, bike-ability.*
- *Allows all modes of transportation to be considered by the user, in the context of the housing-job relationship, for the long-distance commutes.*
- *Incentivizes additional tools necessary in transportation management and start partnerships with the community at all levels.*
- *The timing and potential to implement citywide approved goals at a faster pace.*

Cons and unintended consequences:

- *Short term impact (strong perception).*
- *One-size-fits-all approach.*

- *Does not include an option for single-family housing - limits housing choices.*
- *Degree of correlation between access to transportation and unequitable outcomes in unstable neighborhoods.*
- *Necessitates a transition period and may require periodic assessment and adjustment together with strong and clear assessment metrics of the impact.*
- *Will need a larger framework for access to transportation citywide.*
- *Will force a different approach to public right-of-way management to address potential overburden of on-street parking.*
- *Will need additional tools to support an efficient use of public right-of-way and existing parking supply on private property.*
- *Relies on additional tools and mechanism that are not in place fully but are starting to manifest (shared parking options).*
