

Industrial Categories Requiring Industrial Wastewater Discharge Permit

The following industrial categories require an industrial wastewater discharge permit.

- Metal Finishing - including, but not limited to:
 - Electroplating
 - Coating (chromating, phosphating, and coloring)
 - Electroless Plating
 - Anodizing
 - Chemical Etching and Milling
 - Printed Circuit Board Manufacturing
- Organic Chemicals, Plastics & Synthetic Fibers
- Inorganic Chemicals
- Soap and Detergent
- Laundries - including, but not limited to:
 - Industrial
 - Commercial
- Plastics Molding and Forming
- Metals Forming
- Metal Molding, and Casting - including, but not limited to:
 - Aluminum Casting
 - Copper Casting
 - Ferrous Casting
 - Zinc Casting
- Non-ferrous Metals Manufacturing
- Non-ferrous Metals Forming
- Battery Manufacturing
- Centralized Waste Treatment
- Semiconductor Manufacturing - including, but not limited to:
 - Cathode Ray Tube manufacturing
 - Electronic Crystals production
 - Luminescent materials manufacturing
 - Phosphorescent coatings
- Pharmaceuticals
- Pesticides Production - including, but not limited to:
 - Manufacturing
 - Packing and repackaging

Industrial Categories Requiring Industrial Wastewater Discharge Permit

- Formulation
- Food Processing - including, but not limited to:
 - Baked Goods manufacturing
 - Dairy Products Processing
 - Rendering
 - Soft Drink Bottling
- Leather Tanning and Finishing
- Porcelain Enameling
- Pulp, Paper and Paperboard manufacturing
- Paving and Roofing Materials
- Printing and Publishing
- Rubber Manufacturing
- Glass Manufacturing
- Transportation Equipment Cleaning - Including, but not limited to:
 - Tank truck cleaning
 - Rail car tank cleaning
- Paint and Ink Formulating
