

Memorandum

CITY OF DALLAS

DATE January 29, 2016

TO The Honorable Mayor and Members of the Dallas City Council

SUBJECT
Dallas Levee System (Slide Repairs)

Trinity Watershed Management flood control crews have begun work to repair superficial skin slides on the Levee System caused by the recent rainfall events. The current weather and levels of the Trinity River have permitted staff to proceed with the repairs.

As repairs continue you will notice heavy equipment such as excavators, track loaders and vibratory rollers around the levee system. Each repair will vary depending on scope, material required and work area. In most cases, old material will be removed and will be replaced with new material to bench levee.

The first phase of work has started or will begin at the following six locations:

- 1250 Round Table Drive
- 4678 Mexicana Road
- 1904 Donosky Drive
- 1962 N. Stemmons Freeway
- 1100 Conveyor Lane
- 3038 Quebec Street
- 111 Regal Row

The levee system is working as intended and staff will continue to monitor these areas and will continue slide repairs at these locations and other identified areas. Slides are a normal occurrence and the repairs do not pose a safety risk to the general public. The public is advised not to enter work zone areas.

Please feel free to contact me if you have any questions or concerns.

A handwritten signature in black ink, appearing to read 'Mark McDaniel'.

Mark McDaniel
Assistant City Manager
