Good morning,

Just a quick update I was able to take 5 readings last night 8:25 pm. 8:45pm 9:00pm 9:15pm and 9:28pm. The locations of the reading were taken based on information provided to me by Mr. Dean at the location in regards to staging of the event.

Best,

The complainant said around and after 9:00 pm is when it gets loudest for weddings...during and after the send off. He also indicated that there is alley work going on behind the house during the day that would add to the ambient noise, but I think you were already planning to do these in the evening(s) anyway. Thanks again.

Paul,

I have visited <http://www.aldredgehouse.com/> the locations official website and found no listing of any future events. I also visited their Facebook Page <https://www.facebook.com/AldredgeHouse> and found no mention of any events. I also conducted a google search and was unable to locate any event for this coming weekend or in the future.

If there is an event this weekend my plan is take at least 3 ambient readings on 6/25/15 and then take a reading on 6/27/15. While the Aldredge house is an event location they sometimes only hold a wedding ceremony or a wedding reception, sometimes both. Do we have an idea during what time the noise issue is at its peak so that I may take the readings during this time frame.

Does anyone know what time the event is scheduled for this weekend?

Good afternoon,

I conducted readings this Saturday. I am using this Saturday readings as ambient readings since the scheduled event was over before I began to take readings. It was a small 35 person family event it ended about 830 pm, it was very cordial and created very little noise.
