

Lane Plating Works

**City of Dallas Community Meeting
April 17, 2017**

U.S. EPA Region 6

Site Location

U.S. EPA Region 6

Location and History

- ▶ Located on Bonnie View Road between E. Ledbetter Drive and Simpson Stuart Road immediately north of College Park
- ▶ Operated as an electroplating facility for approximately 90 years.

Site Property

U.S. EPA Region 6

Operational History

▶ Primary activities

- Hard Chromium Plating
- Cadmium Plating

▶ Other activities

- Black Oxide Coating
- Electroless Nickel Plating
- Machining/Grinding
- Lead Melting Pot for Anode Repair

Recent Site History

- ▶ Late 2015 – TCEQ noted the Lane Plating facility had ceased operations and closed
- ▶ Dec. 2015 – Lane Plating filed for bankruptcy
- ▶ Late Dec. 2015 – TCEQ conducted a limited removal action
 - Lab-packed select chemicals in the facility lab
 - Pumped waste from two on-site sumps (~8,000 gals)
 - Secured the facility
- ▶ Jan. 2016 – TCEQ Referred the site to EPA

Removal Assessment

- ▶ Site reconnaissance completed on March 23, 2016

- ▶ Field activities conducted April 12-13, 2016
 - Liquid waste sampling
 - Soil sampling

- ▶ Sample results
 - Liquid wastes are characteristically hazardous
 - Soils are contaminated predominantly with hex chrome, lead, and mercury above EPA Risk Screening Levels (RSLs)

Soil Sampling

- ▶ Soil sampling conducted:
 - April 12 – 13, 2016 (initial Removal Assessment)
 - Sept. 19 – 23, 2016 (in conjunction with the Removal Action)

- ▶ Most common metals detected associated with Lane Plating operations:
 - Hexavalent chromium
 - Lead
 - Mercury

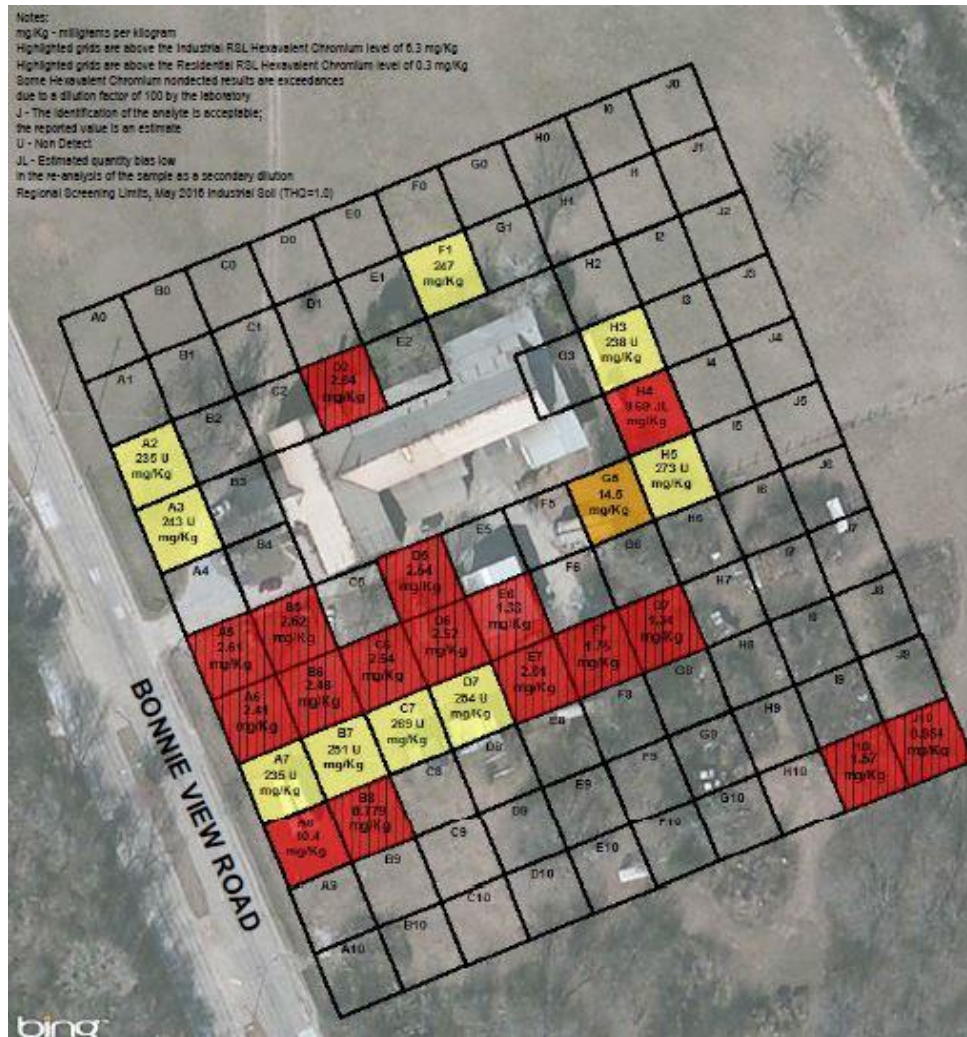

Soil Sampling Grid

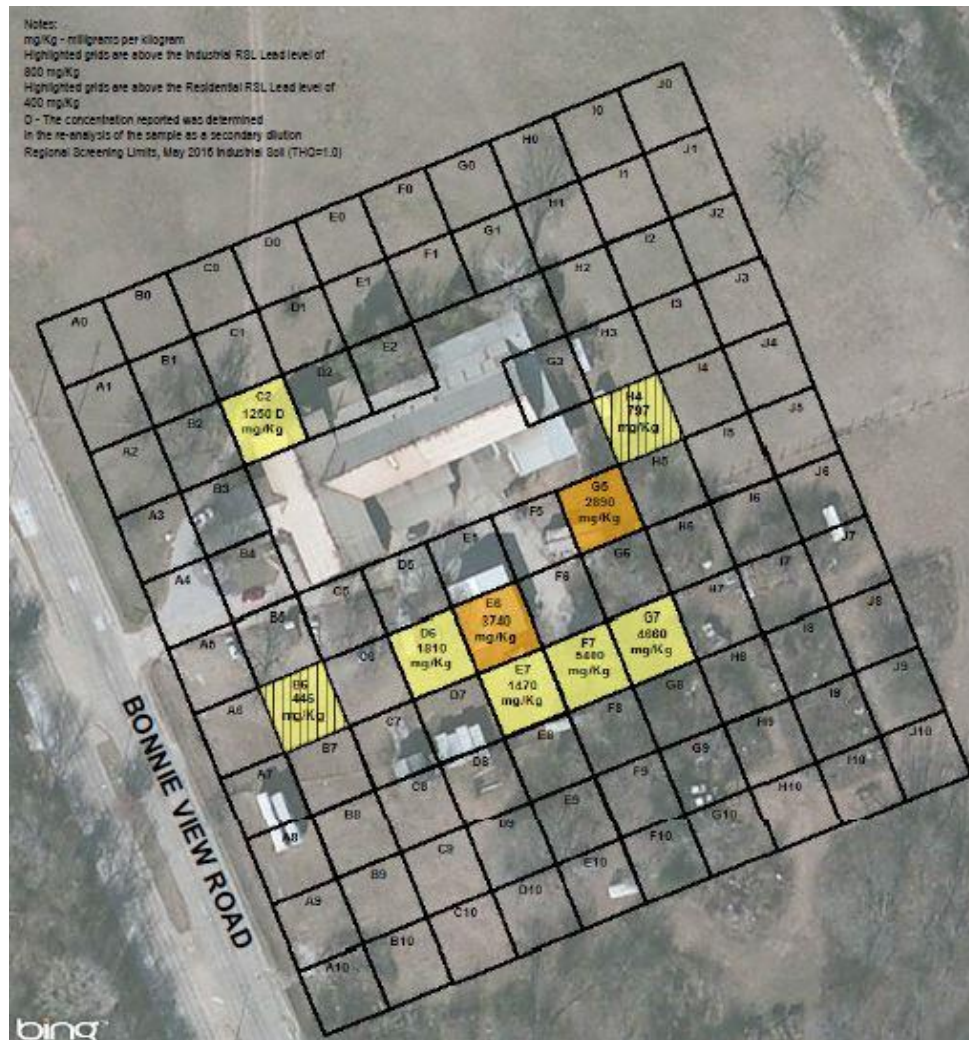

U.S. EPA Region 6

Soil Sampling – Hex Chrome

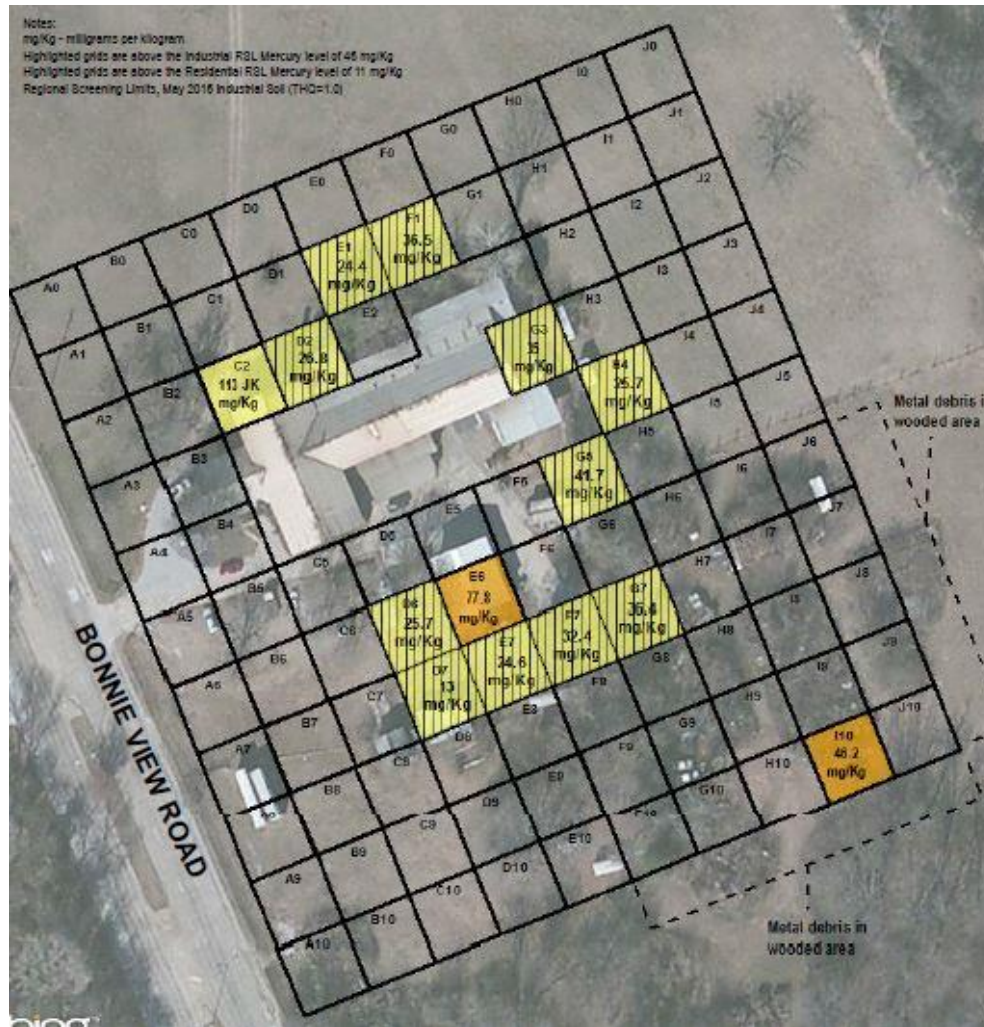

Soil Sampling – Lead

U.S. EPA Region 6

Soil Sampling – Mercury

Removal Action

- ▶ Removal action conducted from October 3 through November 18, 2016
- ▶ Quantity of wastes disposed – **187,868 lbs**

Removal Action (cont'd)

- ▶ Wastes disposed included:
 - Plating solutions (cyanide, chromium, sulfuric acid, caustic solutions)
 - Paints
 - Elemental mercury
 - Flammable liquids and aerosols
 - Waste oil/oil filters
 - Acidic and caustic solids
 - Soils

Removal Action – Hazcat/Sump Cleaning

U.S. EPA Region 6

Removal Action – Vat Cleaning

U.S. EPA Region 6

Removal Action – Waste Transport

U.S. EPA Region 6

Removal Action - Laboratory

U.S. EPA Region 6

Removal Action – Chem Storage Area

U.S. EPA Region 6

Removal Action - Vats

U.S. EPA Region 6

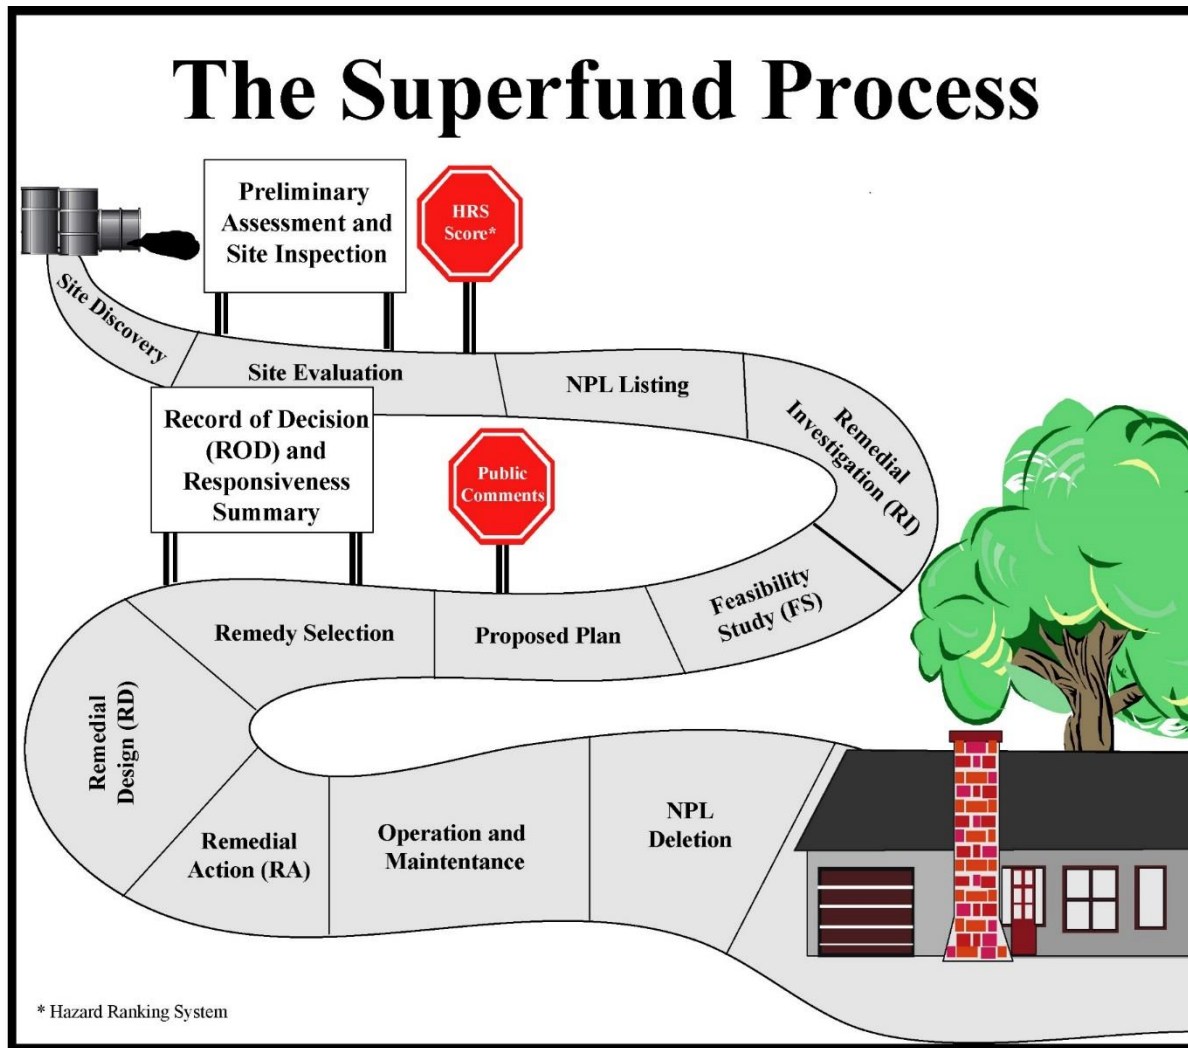

Removal Action – Machine Shop

U.S. EPA Region 6

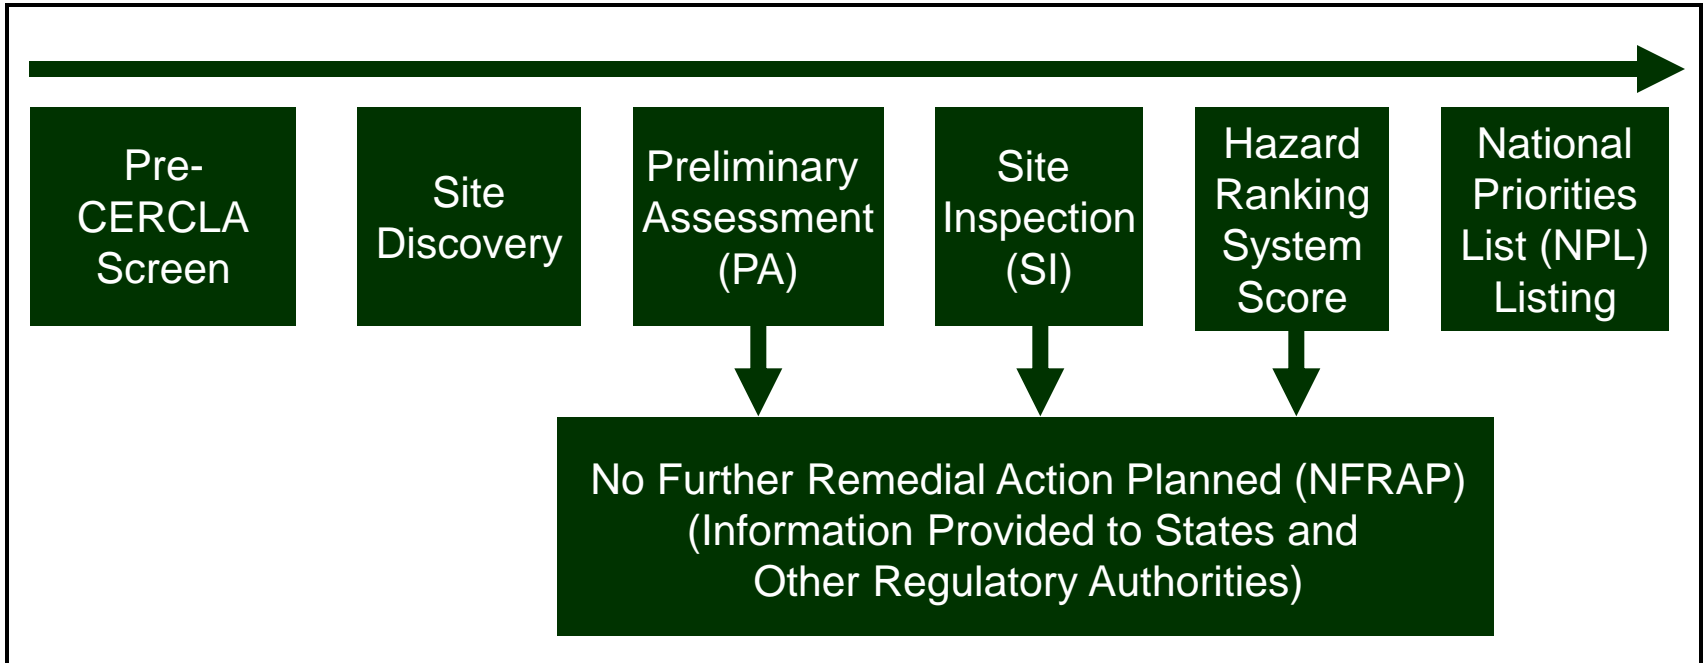

Superfund Process

Purpose of Site Assessment

- ▶ The primary purpose of Site Assessment activities is to obtain the data necessary to identify the highest priority sites posing threats to human health and the environment
- ▶ The Site Assessment Process is a structured process comprised of a series of limited investigations

Site Assessment Activities

← Removal and Enforcement Action May Occur at Any Stage →

Preliminary Assessment

- ▶ Site Visit/Field Reconnaissance conducted on February 24, 2016
 - Potential Sources
 - Ground Water Pathway
 - Soil Exposure Pathway
 - Surface Water Pathway
 - Air Pathway

Site Inspection

- ▶ Site Visit/Field Reconnaissance conducted on June 1, 2016

- ▶ Field Activities completed from July 18-21
 - Soil
 - Surface Water
 - Sediment

Site Inspection (cont.)

- ▶ Site Inspection evaluated the Surface Water Pathway
- ▶ Receptors include:
 - Wetlands
 - County preserves containing wetlands (Joppa Preserve/Lemon Lake Park)
 - Endangered/threatened species

Current Status

- ▶ Is currently being evaluated to determine the site's eligibility for listing on the National Priorities List (NPL)
- ▶ Hazard Ranking System (HRS) is used to evaluate site for NPL eligibility:
 - The HRS is a numerically based scoring system or model
 - The HRS is a screening tool and not a risk assessment
 - The HRS score is the primary criterion EPA uses to determine whether a site should be placed on the NPL

Next Steps

- ▶ To be eligible for the NPL:
 - Site must score 28.5 or greater on the HRS
 - Official support from the State of Texas

- ▶ If **not** eligible for the NPL, then
 - Site is referred to the State of Texas
