

DETERMINATION OF ELIGIBILITY REQUEST NEW CONSERVATION DISTRICTS & EXPANDING AN ESTABLISHED CONSERVATION DISTRICT

CITY OF DALLAS

A **Conservation District** (CD) is a change in zoning that helps preserve an area’s physical attributes (including architectural styles and other physical characteristics that make an area unique) by providing additional development and architectural regulations. Each Conservation District is tailor-made to a neighborhood and what it wants to conserve. Once approved by the City Council, the Conservation District regulations become the zoning for the area and all new work within the area must comply with the Conservation District regulations.

Before a neighborhood committee may request Pre-application Meetings, apply for a Conservation District, or apply to expand an established CD, a neighborhood committee must request a Determination of Eligibility and the director must determine that an area is eligible. A request for a determination of eligibility is not an application for a CD.

- List the names and addresses of the Neighborhood Committee members in the spaces provided, below. A neighborhood committee is composed of the property owners of at least 10 properties (geographically dispersed) within a proposed CD or proposed area to be added to an established CD, if less than 10 properties, 50 percent of the property owners within the proposed CD, proposed area to be added to an established CD, or an established CD.

Committee Member Name	Property Address	E-mail

6.		
7.		
8.		
9.		
10.		

List the name and address of the neighborhood committee member designated to receive notice and information from the department.

Name	Mailing Address	Email

- 1) Attach a map of the request area or if expanding an established CD, attached a map of the area to be added.
- 2) Attach a written statement explaining how the neighborhood committee selected the request area. *For example, the request area is the original subdivision or was not included when the CD was established.*
- 5) Attach a list of the architectural styles of each main building in the area of request and the year that each main building was constructed. *Note the main building in a residential zoning district is typically the house.*
- 6) Attach a written statement describing the physical attributes of the area. In addition to the physical features of the buildings in the proposed conservation district, physical attributes may also including the physical characteristics of the area that make it unique (e.g., spatial relationship between buildings, street layout, and natural features)

- 7) Attach a written statement describing how the area of request meets all of the eligibility criteria in Section 51A-4.505(d)(1)(C). Note: when expanding an established CD, the area of request is not required to be at least one blockface.

Determination of Eligibility Criteria:

Within **65 days** after a complete request for determination of eligibility is submitted, the director shall make a determination of eligibility. **An area is not eligible for a CD unless it satisfies all of the following criteria:**

- a) The area contains at least one blockface. A blockface means the linear distance of lots along one side of a street between the two nearest intersecting streets. If a street dead ends, the terminus of the dead end will be treated as an intersecting street.
- b) The area must be either “stable” or “stabilizing” as defined in this Section 51A-4.505(a).
- c) The area is compact and contiguous with boundary lines drawn to the logical edges of the area or subdivision, as indicated by a creek, street, subdivision line, utility easement, zoning boundary line, or other boundary.
- d) At least 75 percent of the lots are developed with main buildings that are at least 25 years old.
- e) The area has physical attributes that include recognizable architectural style(s).

An area is not eligible to be added to an established CD unless:

- a) The area satisfies all of the criteria in Section 51A-4.505(d)(1)(C), except that the area to be added is not required to be at least one blockface, and
- b) The area to be added is similar to and compatible with the physical attributes of the established CD.

Next Steps:

- If the director determines that the area is eligible for a CD, the director will notify the designated neighborhood committee member in writing. Notice is given by depositing the notice properly addressed and postage paid, return receipt requested, in the United States mail. The director’s determination that an area is eligible for a CD may not be appealed. Additionally, after the Director determines an area is eligible for a CD, the boundaries may only be changed by city council at a public hearing to consider a proposed CD or by a request for a new determination of eligibility after the initial determination of eligibility expires
- Within **65 days** after the director determines an area is eligible for a CD and before a neighborhood committee may apply for a CD, the neighborhood committee must request **Pre-application meetings**. A request for Pre-application meetings is not an application for a CD.
- If the director determines that the area is not eligible for a CD, the director shall notify the designated neighborhood committee member in writing stating why the proposed area is not eligible. Notice is given by depositing the notice properly addressed and postage paid, return receipt requested, in the United States mail. The director’s determination that an area is not eligible for a CD may be appealed to the city plan commission by the neighborhood committee.
- For detailed information on the process to adopt or expand an existing Conservation District, see Development Code Section 51A-4.505, “Conservation Districts” or the Department’s web page:

Lakewood Conservation District Expansion

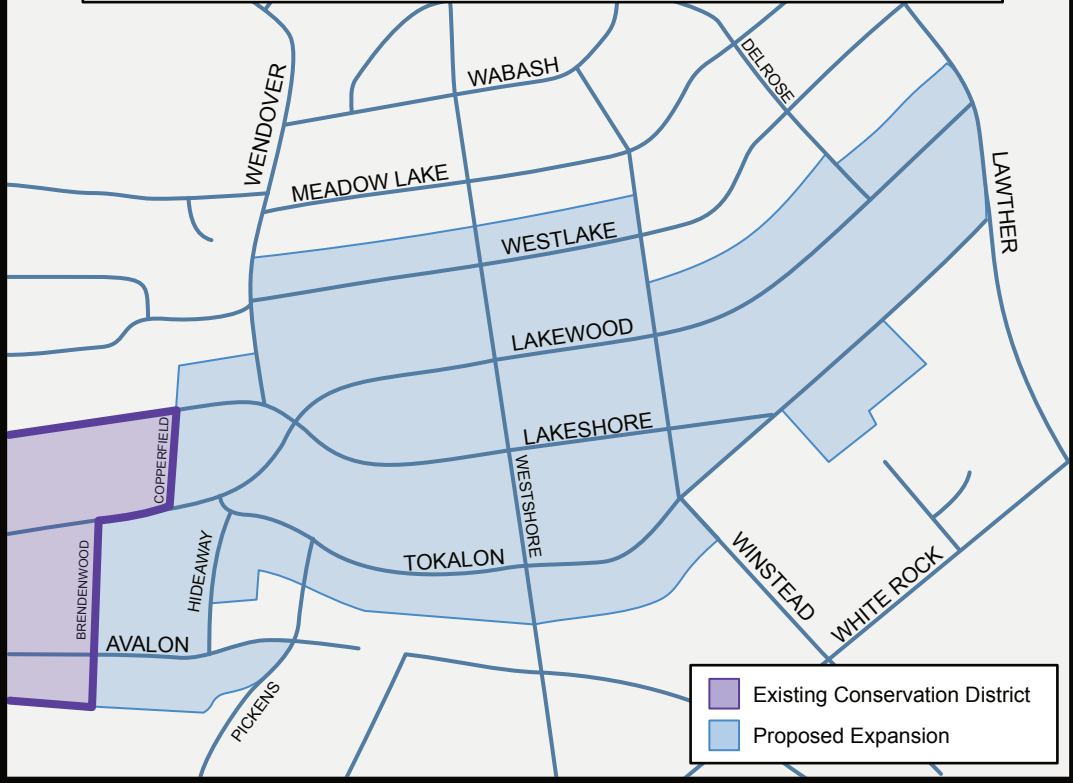

Exhibit A

Lakewood CD – Proposed Expansion Map

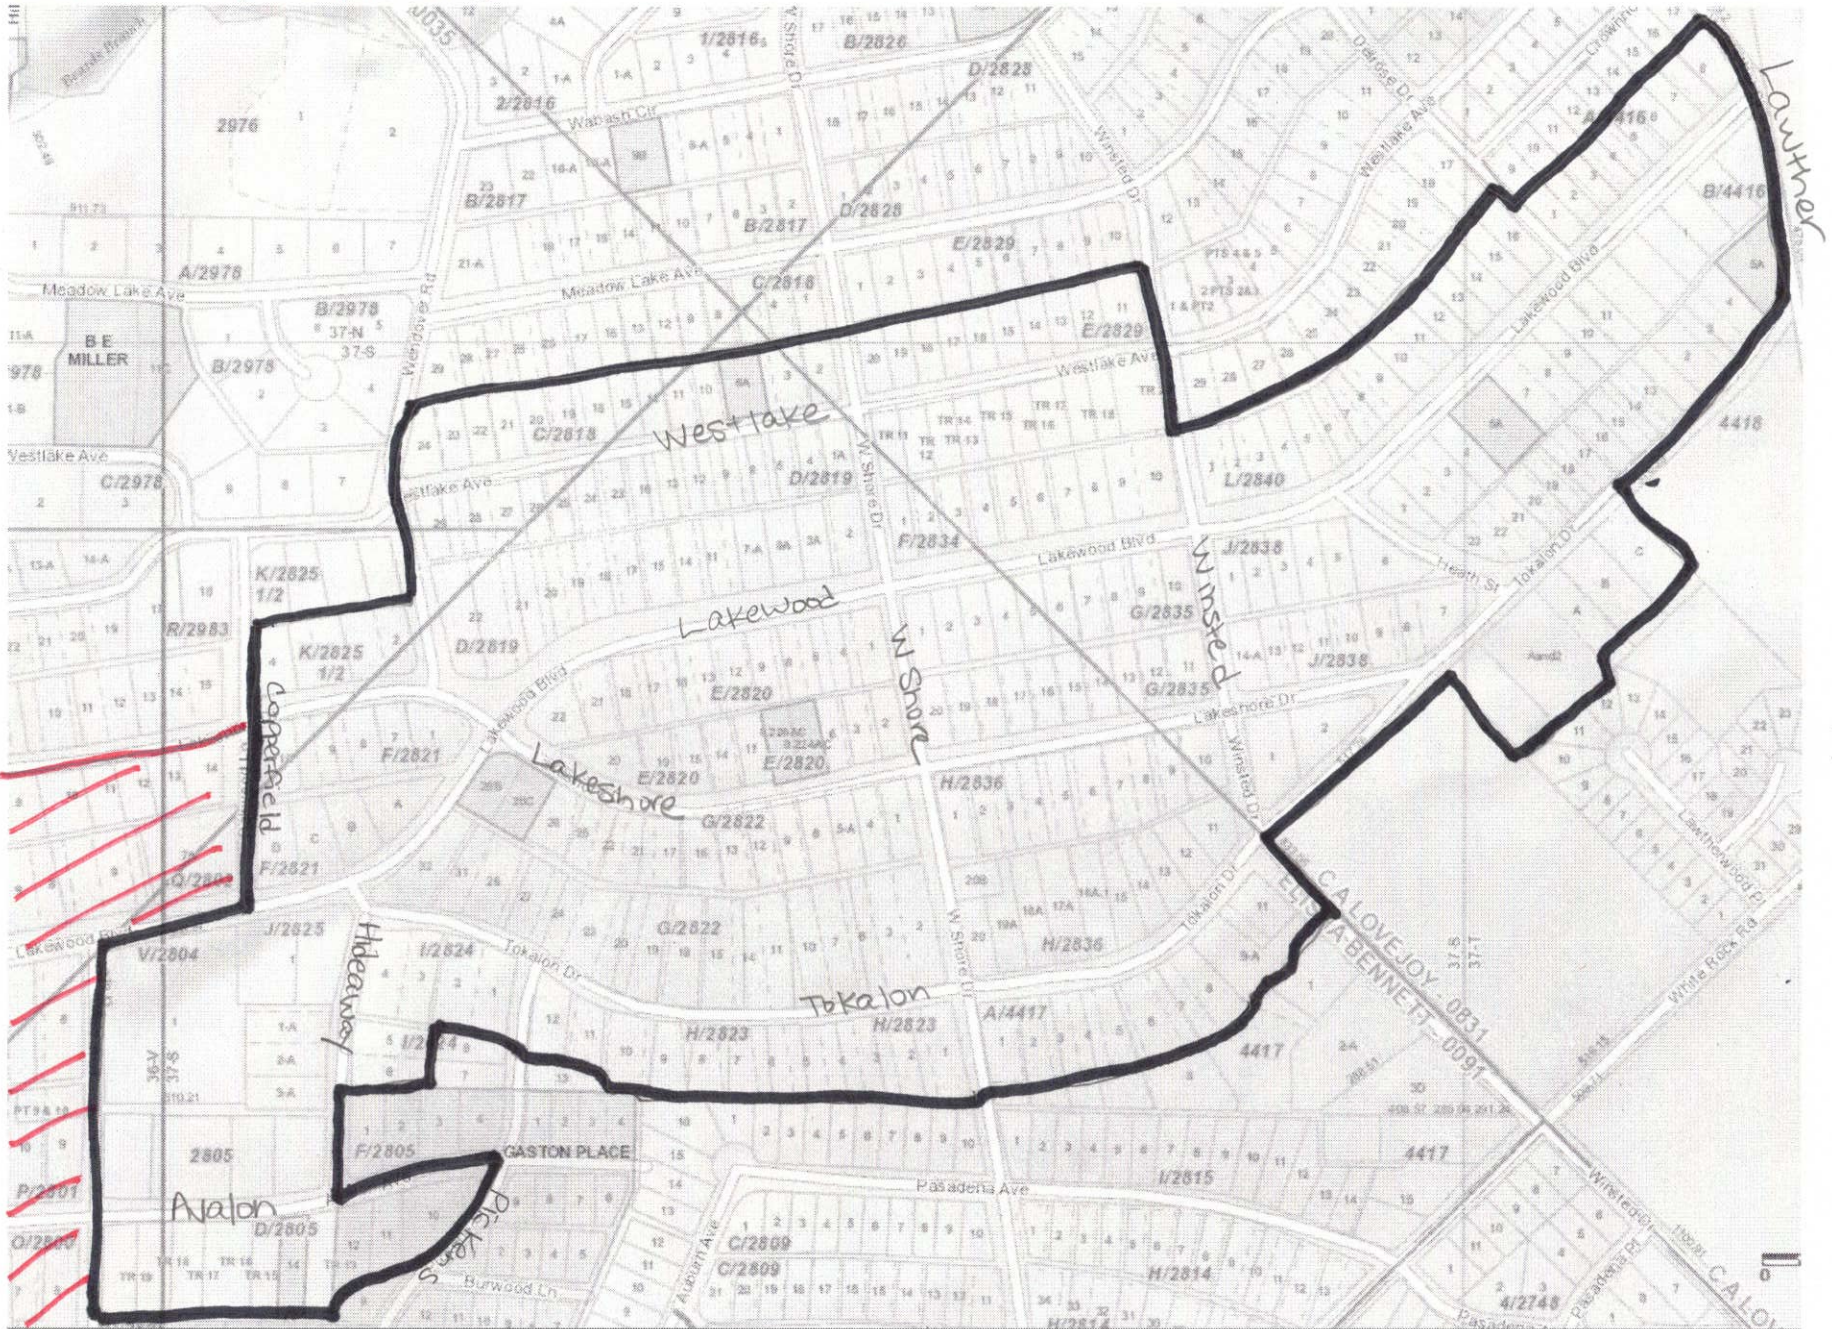

Exhibit B

REQUEST FOR DETERMINATION OF ELIGIBILITY FOR CONSERVATION DISTRICT EXPANSION – LAKEWOOD

Defined Boundaries:

The proposed boundaries were selected by the committee as the area represents an inventory of architecturally significant structures and an important historical period in the development of Dallas. This is a proposed expansion of the existing Lakewood Conservation District and borders the existing conservation district on the west side of the proposed expansion area. The defined area, located in East Dallas, continues to exhibit many original structures and historical architecture. The historical subdivisions included in the proposed boundaries are: Westlake Park, Monticello, and Gaston Place. See **Exhibit A – Boundary Map**. The original Lakewood Conservation District only includes the Country Club Estates subdivision.

The proposed expansion area includes the area generally bounded by the south block face of Avalon Avenue on the south, the west block face of West Lawther Drive on the east, the north block face of Westlake Avenue on the north, and the east block face of Copperfield Lane on the west. Copperfield Lane is known as Oakwood Lane on the Dallas County Appraisal District map.

The proposed expansion area includes:

- 6900 and 7000 blocks of Westlake Avenue
- South block face of the 6800 block of Avalon Avenue
- North block face of the 6800 block Avalon Avenue between Brendenwood Drive and Hideaway Drive
- 2400 block of Hideaway Drive
- 6800 block of Lakeshore Drive between Copperfield and Wendover Road
- 6900, 7000 and 7100 blocks of Lakeshore Drive
- South block face of the 6800 block of Lakewood Boulevard between Brendenwood Drive and Tokalon Drive
- North block face of the 6800 block of Lakewood Boulevard between Copperfield Lane and Lakeshore Drive
- 6900,7000,7100,7200 and 7300 blocks of Lakewood Boulevard
- 6800, 6900, 7000, 7100, 7200 and 7300 blocks of Tokalon Drive
- 2700 block of West Shore Drive

These blocks include 275 properties and are in City Council District 9.

These block faces fulfill the requirement of the conservation district ordinance which says a conservation district must have at least one block face.

How the Neighborhood Committee Selected the Request Area:

The committee selected the proposed boundaries for the following reasons:

1. The proposed blocks are contiguous with the existing Lakewood Conservation District.
2. The boundaries include homes that exemplify significant examples of various recognized architectural styles similar to those within the existing Lakewood Conservation District.
3. The homes in the proposed blocks were developed in the same period as those within the existing Lakewood Conservation District (primarily 1925 – 1946).

4. The homes in the proposed blocks include those from the acclaimed architect and builder, Clifford D. Hutsell, Charles Dilbeck, Bertram Hill, and the famed developers, Dines and Kraft, Co.
5. Architectural requirements will ensure appropriate standards to complement the existing historical styles in the original neighborhood.
6. The area contains complete block faces as described above.

Architectural Styles of Homes

The styles of each home are included in the attached listing alongside the addresses, year built and current use. See **Exhibit C**. Also, attached are photos exemplifying the architectural styles. See **Exhibit D**.

Physical Attributes – Architectural Styles – Period of Significance – Method of Construction

This area of Lakewood was primarily developed over a period from 1925 to 1946. Lakewood Country Club Estates was the original addition and the development of Lakewood continued into the Westlake Park, Monticello, and Gaston Place additions.

Dines and Kraft were the original developers of Lakewood and continued the development to the east of the existing Conservation District in the Westlake Park and Monticello additions. There are several Dines and Kraft homes in the proposed expansion area. Dines and Kraft primarily developed homes in the Tudor style.

Clifford D. Hutsell is known for his development of a series of multi-colored tile-roofed homes made of distinctive buff-colored brick, balconies, stained glass windows, glazed tile, and Potter iron accents. The buff-colored brick is distinctive to the Hutsell homes and was inspired by Hutsell's visit to California, modeling the stucco seen in Spanish style architecture there. From 1926 to 1947, Hutsell built 50 homes in the Lakewood area. The majority of Hutsell homes in Lakewood are in the proposed expansion area while none are currently protected in the existing Conservation District. The first homes Hutsell built in Dallas are in the Park Row Historic District. Some of the Hutsell homes on Lakewood Boulevard are pictured in Virginia McAlester's Field Guide to American Houses as examples of Spanish Eclectic architecture.

The architectural styles found in the proposed expansion area are predominately Tudor, Spanish Eclectic, French Eclectic, Minimal Traditional, Neo-Classical, and Colonial Revival. These architectural styles comprise the majority of the architectural styles also found in the existing Lakewood Conservation District. The construction materials used in these various architectural styles include masonry and wood sided structures; pier and beam foundations; tile, slate, and composition shingle roofs; stained and leaded-glass windows; balconies; and courtyards, similar to and compatible with many of those in the existing Lakewood Conservation District.

Of the 275 total houses in the area, 89 are Tudor; 54 are Spanish Eclectic; 14 are French Eclectic; 11 are Minimal Traditional; 5 are Neo-Classical; 26 are Colonial Revival; and 76 are undefined.

In the district, according to DCAD data, the average age of the homes is 77 years old (1945), with the following breakdown shown below:

From 1924 – 1929, 66 houses were built.

From 1930 – 1939, 81 houses were built.

From 1940 – 1949, 50 houses were built.

From 1950 to 1959, 28 houses were built.

From 1960 to present, 44 houses were built.

Since 2011, 12 houses have been demolished for new construction, with 5 of those occurring in the last year.

Eligibility Requirements

The proposed expansion area meets the eligibility criteria in Section 51A-4.505(d)(1)(C) as follows:

- (i) The area must be either “stable” or “stabilizing” as defined in this section.
The area is stable in that it is expected to remain substantially the same over the next 20 years with continued maintenance of the properties. While some changes in structures may occur, all such changes are expected to be compatible with the surrounding development.

Due an increasingly high demand to live in Lakewood, newly constructed modern style houses are encroaching on the neighborhood. The neighborhood is concerned that without a conservation district they may face substantial inappropriate redevelopment and encroachment into the neighborhood.
- (ii) The area is compact and contiguous with boundary lines drawn to the logical edges of the area or subdivision, as indicated by a creek, street, subdivision line, utility easement, zoning boundary line, or other boundary.
The boundary is contiguous with the existing Conservation District and continuous with lines drawn on logical edges.
- (iii) At least 75% of the lots are developed with main buildings that are at least 25 years old.
The attached listing of properties located in the defined boundaries verifies the 75% requirement. All data, other than architectural styles, was obtained from www.dcad.org.
- (iv) The area has physical attributes that include recognizable architectural styles.

The architectural styles found in the proposed expansion area are predominately Tudor, Spanish Eclectic, French Eclectic, Minimal Traditional, Neo-Classical, and Colonial Revival. These architectural styles comprise the majority of the architectural styles found in the existing Lakewood Conservation District.
