Disclaimer

The herein shown flow chart depicts the general progression of a new project from design to completion through the above listed divisions of the City of Dallas. It illustrates established internal policies and procedures of the various departments and critical basic dependencies that ensures successful outcome for any design project. The inclusion of any and all steps of the Engineering process is at the sole discretion of the individual Project Manager and dependent on the scope of a specific project.

Successful outcome of a design project is highly dependent on the implementation of the herein shown procedures together with verification and documentation.

Individual procedures, processes and requirements are detailed in the Department of Public Works Paving Design Manual for the City of Dallas for projects started before October 1, 2019 and in the City of Dallas Street Design Manual for projects started after October 1, 2019.

This is not a legal document.

This document has been prepared with the consent, knowledge and cooperation of all the listed Departments and under my direct supervision.

Christina Turner-Noteware, P.E.
Assistant Director of Department of Public Works
