STORM WATER MANAGEMENT

www.wheredoesitgo.com

The illustration shows a cross-section of a storm drain on the left, with an arrow pointing to a river on the right. The river is polluted with soap suds and a fish is shown with a red 'X' over its eye, indicating it is sick. The background shows a landscape with trees and a blue sky with rain falling.

FACT:

 One gallon of liquid soap washed down a storm drain pollutes up to 200,000 gallons of water.
