Memorandum

DATE January 13, 2017

TO Honorable Mayor and Members of the City Council

SUBJECT The BIG Picture 2017 Capital Bond Program: Follow Up Information – Street Conditions

On Wednesday, January 18, 2017, you will be briefed on The BIG Picture 2017 Capital Bond Program: Follow Up Information – Street Conditions. The briefing materials are attached for your review.

Please feel free to contact me if you have questions or need additional information.

Jill A. Jordan, P.E. Assistant City Manager

Attachment

c: Honorable Mayor and Members of the City Council A.C. Gonzalez, City Manager Larry Casto, City Attorney Craig D. Kinton, City Auditor Rosa A. Rios, City Secretary Daniel F. Solis, Administrative Judge Ryan S. Evans, First Assistant City Manager Eric D. Campbell, Assistant City Manager Mark McDaniel, Assistant City Manager Joey Zapata, Assistant City Manager M. Elizabeth Reich, Chief Financial Officer Sana Syed, Public Information Officer Elsa Cantu, Assistant to the City Manager – Mayor & Council Rick Galceran, P.E., Director, Mobility and Street Services

The BIG Picture 2017 Capital Bond Program: Follow up Information -Street Conditions City Council Briefing January 18, 2017

Outline

- Mobility and Street Services (MSS) overview
- Life cycle of streets
- Rating street conditions
- Condition of streets and the City's goals
- Work plan for maintaining and improving streets

Who Maintains our Streets

Mobility and Street Services

Dallas Water Utilities

- Responsible for Streets, Alleys & Bridges through:
 - Routine maintenance & repair
 - Major maintenance: (in-house & contractors)
 - Restoration & Rehabilitation of "unimproved" streets
 - Resurfacing
 - Reconstruction
 - New Construction
 - Procure and manage design contracts
 - Procure, manage and inspect construction contracts
 - Inclement weather emergency response

Funding: General Fund & Capital Bonds

- Street reconstruction as a result of water and wastewater replacement
 - Selection of design consultants
 - Bidding projects for construction
 - Managing, inspecting design and construction

Funding: Enterprise funding

- Bond Program funding used for construction, reconstruction and resurfacing
- General funding used for maintenance to extend the life of these infrastructure items

Mobility and Street Services Department

- \$161M Budget with 702 positions
- Maintains over 11,770 lane miles of streets
- The Challenge
 - 11,770 Lane Miles of Streets
 - 1,400 Miles of Alleys
 - 88,000 Street Lights (Oncor-72K, TxDOT-9K, CoD-7K)
 - 375,000 Traffic related signs
 - 1,500+ Traffic Signals of which 80% are over 25 yrs old
 - 1,300 Miles of Bar Ditches
 - 1,700 Acres of Medians/City ROW to mow
 - 9,000 Crosswalks
 - 1,400+ Miles of Lane Striping

Other MSS Services

- Streets & Alleys
 - Pothole repair
 - Street & alley repair
 - Litter removal
 - Response to roadway hazards
 - Street sweeping (CBD)
 - Crack sealing of streets (prevent water infiltration)
 - Homeless encampment cleanups
 - Special Events barricades
- Contracted Services
 - Street sweeping (major thoroughfares)
 - Mowing of medians/ City & TXDOT rights-of-way (ROW)
 - Lane line and crosswalk
 - Resurfacing
 - Micro surfacing and Slurry Seal

- Roadside drainage
- Guard rail repair
- Inlet cleaning
- Severe weather response
- Unimproved alley maintenance
- ROW maintenance
- City surplus property maintenance (mowing & litter removal)

Other MSS Services

- Surveying
 - Manage survey records vault
 - Plat reviews involving City property
 - Land survey services for all City departments
- Street Cut and Right of Way Management
 - Monitors and enforces public infrastructure activities
 - Permits, inspects and reviews construction locations
 - Ensures safe work zones
- Transportation Planning
 - Thoroughfare Plans
 - Bike Plan Implementation
- Traffic Operations
 - Traffic studies
 - Traffic signals
 - Street striping and crosswalks
 - Traffic signs

- Right-of-way field notes reviews
- Horizontal and vertical control drawing plan reviews
- Property/R-O-W lines

- Street Lighting
- Congestion Management
- Lane Closure Permits

Other MSS Services

- Construction Inspection
 - Concrete and asphalt paving
 - Storm drainage
 - Storm water pollution prevention
 - Site preparation
 - Traffic safety control
- Engineering Design
 - Street and alley reconstruction
 - New street, alley and sidewalk petitions
 - Complete Streets
 - Sidewalk replacement
 - Trails
 - Thoroughfares and urban design / streetscape
 - Intergovernmental partnerships and bridge repairs
- Pavement Assessment Management
 - Collects and assesses data of street and alley pavement conditions
 - Prioritize maintenance based on street conditions
 - Maintains database for Pavement Condition Inventory

Street Treatments Managed by Dallas Water Utilities

Street and alley repairs by the Dallas Water Utilities are associated with pipeline replacement. For asphalt streets the City policy requires that an entire lane be reconstructed at the location for where the pipeline is replaced. From joint to joint for concrete streets. 8

Life Cycle of a Street

- Typical life of street 20 to over 70 years depending on:
 - Pavement design
 - Traffic loads
 - Soil conditions
 - Weather/precipitation patterns

Proper maintenance

- National studies indicate that streets, without proactive and major maintenance programs, can degrade as much as 10% per year.
 - Dallas' data indicates a 4.8% per year rate

Streets Evaluation Evolution

- 1975 visual inspections start
 - Ratings were subject to judgment by staff
- 2008 streets inspected by one street analysis vehicle (streets inspected on a 2 year cycle)
- Starting in 2017, streets inspection was privatized using contractor's street analysis vehicles (all streets will be inspected within 6-months)
- In 2000, PCI protocol was established by the American Society for Testing Materials to rate and score street conditions. Letter grades have been assigned for A (best) to E (worst)
- Technical rating of streets is based on extent and severity of distress (roughness, cracking, etc.)

Street Condition Ratings

	Rating		Description			
	A		Excellent Pavements that have no distress (mostly new or newly rehabilitated surfaces)	100-85		
	В		Good Very good ride quality - Can benefit from preventive maintenance (slurry seal, crack seal or similar)	85-70		
Satisfactory	С		Fair Acceptable ride quality, though road surfaces are becoming worn – slurry, microsurfacing, partial reconstruction or similar will prevent rapid deterioration	70-45		
Unsatisfactory	D		Poor Marginally acceptable ride quality – microsurfacing, chip sealing, or partial reconstruction, resurfacing or rehabilitation is needed to slow further deterioration	45-35		
Ţ	E		Very Poor Pavement has extensive distress and requires partial or full reconstruction or restoration	< 35		

Streets Degrade Differently

- Streets degrade over time for the following reasons:
 - Shifting soil
 - Harsh weather
 - Usage
 - Inadequate design
 - Poor materials

These events cause streets to crack, allowing for water infiltration that undermines the base material

- Streets degrade at different rates
 - A, B and E streets degrade the slowest
 - C and D streets degrade the fastest
- 53% of our streets are in C condition
 - $-\,$ A at 3.1%, B at 17.0%, C at 53.1%, D at 13.7% and E at 13.1%

Street Degradation Curve, in Lane-miles

Streets degrade at varying rates over their life, from as little as 0.3% to over 10% annually

Street Condition Goals and Background

- 1995 Council adopted a street satisfaction goal of 75% to be completed by 2015
- 1996 Council accelerated the street satisfaction goal of 75% to be completed by 2010
- 2006 Council revised and adopted:
 - 87% satisfactory Citywide (Satisfactory = A's, B's, and C's)
 - Minimum 80% satisfactory in each Council District
 - Goals were to be achieved by completion of 2006 Bond Program in conjunction with an enhanced O&M program
- No council action has been made to change this goal but funding in the last several years has been set to keep streets at their current condition

Streets Conditions-Overview

Street Maintenance Planning

Objectives:

1. Extend the life of all streets

2. Attend to unsafe streets immediately and correct their condition as required (lower cost - short term if it is soon to be replaced soon in a capital program, higher cost - long term if its replacement is not yet planned take awhile)

3. Maximize lower cost maintenance (general fund) to prevent future higher cost replacements (capital funds)

4. Select the most effective, efficient street treatments associated with type of street and its condition (See Appendix A for details on treatment types)

5. Treat the number of lane miles needed to meet the Council's directed goal of keeping streets from further degrading (0% degradation)

Note: Not all street maintenance is planned. This allows response to service requests throughout the year.

Street Maintenance Planning cont.

Annual work plan of street maintenance consists of:

- 1. Capital programed projects
- 2. DWU pipeline replacement projects
- 3. Street general fund maintenance plan

How MSS Plans it General Fund Work by:

- Using the streets PCI, candidate streets are evaluated and matched with the most effective (adding life to the street) and most cost efficient treatment
- Streets in B E condition are considered for treatment
- Selected streets are checked against other planned future treatments by DWU or the capital program
- Coordinated with the annual bike lane work plan
- A final selection of streets to be treated includes balancing projects across Council Districts

GOAL: Treat 568 lane miles to sustain zero overall degradation in the system

	FY 15/16			Original FY 16/17 Goal			
Source	Funding	A/B Lane Miles Treated	C/D/E Lane Miles Treated	Funding	A/B Lane Miles Treated	C/D/E Lane MilesTreated	
Regular Op Budget	\$36.0M	335	244	\$36.0M	335	217	
Additional Street & Alley Fund	\$16.8M		91	\$20.7M		91	
Operating Budget Subtotal	\$52.8 M	335	335	\$56.7M	335	308	
06BP & 12BP	\$66.8M		135	\$44.0M*	0	55	
CDBG			0	\$0.6M	0	2	
17BP			0	\$27.3M	0	105	
MSS Subtotal	\$66.8 M		135	\$71.9M	0	162	
DWU	\$4.2M		98	\$4.2M		98	
Totals	123.8M	335	568	132.8 M	335	568	
Revised Totals due to delayed 2017 Bond Program	123.8M	335	568	105.5 M	335	463	

Effects of Bond Program Delay

- 105 Lane Miles would not be resurfaced in FY17
- If left undone, street condition would theoretically deteriorate by 0.9% by the end of FY17
- Options for making this up are:
 - Reappropriate dollars in the FY17 Budget for streets
 - Double up on capital funds in FY18

Dallas County Partnership Project

- FY 2015-16 City partnered with County Commissioner Dr. Theresa Daniel to participate in a street maintenance program in County District 1
 - Augments the amount of work that the City would do anyway
 - Year 1 County and City split the cost of resurfacing thoroughfares eligible for County reimbursement
 - Year 2 Reimbursement funds are used by the City to fund resurfacing of additional local streets in County District 1
- In FY16 the City completed \$2.4M in resurfacing projects in County District 1
 - The County reimbursed the City \$1.2M
- In FY17 the City will resurface 10.2 lane miles above the 463 lane miles
- In FY17 the City and County are exploring the expansion of this program to other County Districts
- See Appendix B for more details

MSS FY17 Work Plan

Street Repair Type	FY 16/17		
Major Maintenance:	Lane Miles	Budget (in millions)	
Rehabilitation*	30	\$4.5	
Restoration*	56	\$9.2	
Resurfacing*	20	\$6.6	
Partial Reconstruction*	137	\$15.6	
Partial Reconstruction – Asphalt over Concrete (AOC)*	25	\$4.3	
Full Depth Asphalt *	60	\$2.6	
Preventative Maintenance:			
Micro Surfacing **	100	\$1.9	
Slurry Seal**	235	\$3.0	
Capital Projects:			
Reconstruction*	31	\$38.6	
Resurfacing*	26	\$6	
Total	720	\$92.3	

See Appendix C for detailed listing of projects by Council District

*Improves street condition ** Decreases degradation

Next Steps

- Staff will be working with City Council Members to revise the work plan if needed, as shown in Appendix C
- Continue to plan for the next Bond Program

Questions & Comments

Appendix A

Street Treatments/Impacts and Cost

Impacts of Maintenance on Street Condition Ratings

- Proactive maintenance effectively extends life expectancy of streets
- Maintenance work is planned or service request-driven
 - Preventive Maintenance (primarily Full-depth Asphalt/Concrete, Micro Surfacing and Slurry Sealing)
 - Major Maintenance (primarily Rehabilitation, Restoration, and Partial Reconstruction)
- Since most preventive maintenance is performed on satisfactory streets, the overall rating does not increase. Preventive maintenance prevents deterioration that decreases ratings
- Major maintenance on unsatisfactory streets increases the satisfactory overall ratings

Slurry Seal/MicroSurfacing for "B" and "C" rated streets

Full-Depth Asphalt Repair for "C" rated streets

Slurry Seal - This treatment for CONCRETE STREETS WITH ASPHALT SURFACE consists of a ¼-inch layer of sand and fine stone mixed with asphalt emulsion. This seals and smooths the surface and conceals scars from previous repairs. It is used predominately for residential roads with curb and gutter. The work is outsourced to a specialized contractor – after Street Services performs preparation work (such as minor base repair and crack sealing). **Cost:** \$13K per lane-mile. **Life:** 5-7 years.

Micro Surfacing – A treatment for CONCRETE STREETS WITH ASPHALT SURFACE which places a ¼-inch layer of crushed stone mixed with asphalt emulsion. This seals and smooths the surface and conceals scars from previous repairs. It is used predominately for higher-traffic-volume streets with curb and gutter. It is more expensive than slurry seal, but cures more quickly. This work is outsourced to a specialized contractor – after Streets Services prepares the site (doing minor base repair and crack sealing, curb & gutter repair).

Cost: \$19K per lane-mile. Life: 5-7 years.

Full-depth Asphalt Repair - A treatment for ASPHALT STREETS to repair the surface <u>and</u> base failures. Repairs are typically larger than a pothole, but smaller than either Street Resurfacing or Street Rehabilitation projects. After the failed area is cut square and removed, a new base is placed and compacted and an asphalt surface is put in place.

Cost: \$20.50 per square yard. Life: 5-7 years.

Partial Reconstruction for

"C" rated (and some "D" rated) streets

Partial Reconstruction - This is a method used on CONCRETE STREETS. It is **removal and replacement of large, failed sections**, including breakout and removal of old pavement, repair of any base failures, and placing new concrete. To be a candidate for this repair, residential and thoroughfare streets must have less than 25% of failed area.

Cost: \$67.50 per square yard with curb-and-gutter repair. Life: 10-12 years.

Street Rehabilitation for "D" rated streets

Street Restoration for "E" rated streets

Rehabilitation - A treatment for ASPHALT STREETS when a large portion of the surface and the base have deteriorated to an unsatisfactory level. It includes the full-depth repair of base failures, followed by a chip seal, and a new two-inch layer of hot mix asphalt placed over the entire treated segment. Candidate streets are predominately residential asphalt surfaced streets without curb and gutter. **Cost:** \$160K per lane-mile. **Life:** 10-12 years.

Restoration - A treatment for ASPHALT STREETS when the entire surface and the base have deteriorated to an unsatisfactory level. It includes rebuilding the entire base by recycling the old base and surface materials into a new base, followed by a chip seal, and new two-inch layer of hot mix asphalt placed over the entire treated segment. Candidate streets are predominately residential asphalt surfaced streets without curb and gutter. **Cost:** \$180K per lane-mile. **Life:** 18-20 years.

Resurfacing of Pavement for "D" rated streets

Re-Surfacing – This treatment removes the entire asphalt surface, and pulverizes and recycles the old material with new asphalt binder. The new asphalt surface is then placed over the entire surface, compacted, and smoothed to a proper finish. Curb and gutter repair, if needed, is accomplished with the re-surfacing efforts. **Cost:** \$280K per lane-mile. Life: 15-20 years (with maintenance).

Full Reconstruction for "E" rated streets

Reconstruction - This process is the removal of an existing street with extensive failures and/or badly deteriorated condition. In the process, the pavement is broken and removed (and often recycled), as is the base. Drainage concerns are addressed with this process. The sub-base may be reconditioned as needed, then a new base is placed and compacted. The new concrete surface pavement is then placed, as shown above. The construction work is outsourced under bond-issued funding. **Cost:** \$1.35 M per lane-mile. **Life:** 20-50 years (with maintenance).
